

PUBG Mobile lost the number 1 position on Google Play by this super simple game

Bottle Flip is a new game with super simple graphics but harder to play than PUBG Mobile. After nearly 2 months of launch, Bottle Flip has over 1 million downloads and has won the # 1 position in PUBG Mobile's Android rankings.

Bottle Flip is a new game with super simple graphics but harder to play than PUBG Mobile. After nearly 2 months of launch, Bottle Flip has over 1 million downloads and has won the # 1 position in PUBG Mobile's Android rankings.

Bottle Flip is inspired by the "Water Bottle Flip" trend, a trend loved by young people. Its gameplay is quite simple, players only need to calculate the distance of the bottle after it is launched to stand on intermediate objects or not. The time you hold your hand to compress the bottle will determine whether it is far or near.

Although simple, accurate and continuous calculations are not that simple. If you lose, you have to play again from the beginning. Simple gameplay has appeared in many games and has very successful games like Flappy Bird, Color Switch and Stack.

Even though Bottle Flip took the No. 1 position of the Bottle Flip in the Android ranking, that doesn't mean it has more downloads than PUBG. The Google Play rankings arrange apps based on the prevalence of apps at a certain time, in recent times, Bottle Flip has seen a surge in downloads.
