

# PUBG Mobile: Settings that give you better control over your phone

Here are the settings and tips to help you improve your PUBG Mobile control skills on your phone

Still know that PUBG Mobile players are supported a lot of tools to make it easier to control when playing games on the phone. But most if you want to spend **TOP 1** , players still have to use their own control skills in fighting.

So if you see the players from the Android emulator, they are still equal or even better in fighting. The tips under this article will help you control the characters in the game better just by installing the settings in the game or by simple actions in the game.

1. Download PUBG Mobile for Windows
2. Download PUBG Mobile for iOS
3. Download PUBG Mobile for Android

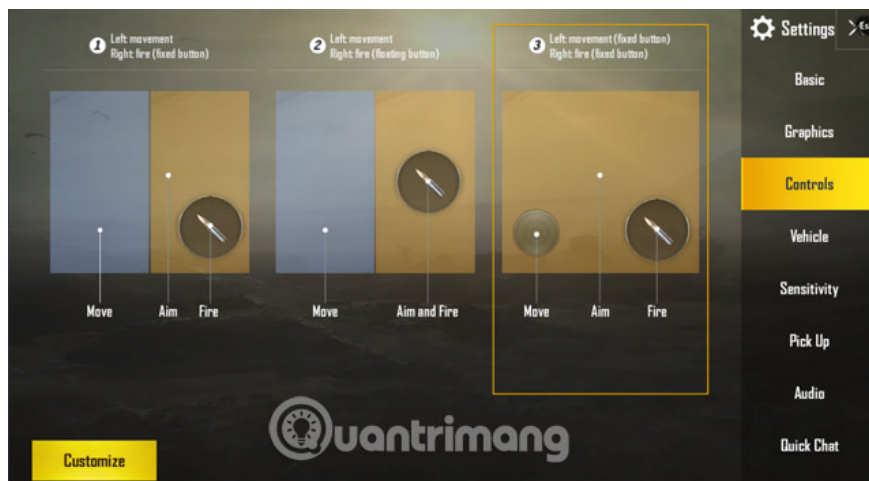

## 1. Use Gyroscope mode

This mode is located in **Basic** in the Game **settings** section, Gyroscope has two custom styles that control the barrel or the character depending on how you choose. To make it easier to imagine, it is the same as in racing games, when you rotate the phone, the game's exterior and characters will shift the perspective according to your movements, more convenient when you have to use the touch to move. turn the character's perspective.

So you will be more dominant in the long and mid-range battles when your touch is not sensitive. You can also customize **Gyroscope** 's sensitivity in **Sensitivity** section .

## 2. Reinstall the control menu

In the Controls section you can perform the installation according to the type of control you like, there are three ways to control for Mobile gamers, making it easy for gamers to control according to their pros.

In addition to selecting the default control preset that PUBG Mobile comes preinstalled with, you can also adjust the button and icon icons that display character parameters or game parameters according to a convenient position to play.

## 3. Use FPP perspective when playing

When using this perspective, players will see that everything is larger than the TPP perspective, which is completely beneficial for players when the screen on the phone is of course smaller than the computer screen. The downside of **FPP** is that players will have limited visibility, but better aiming is an advantage over **TPP**.

In addition to just shooting and running, the FPP view will be more accurate because the gun's centerpiece is not much deviated from the TPP perspective, but this is only effective when you attack the enemy at close range.

#### 4. Use Tilting feature

Under the default settings, the PUBG Mobile tilt feature will not be enabled when new to the game. If you do not know how to enable and use this feature, check out the article **How to tilt the shooter in PUBG Mobile**, you should use this tip in case of hiding behind a tree, rock or in a house Somewhat few people.

Moreover, when tilting, your body will be less exposed to the enemy to attack, so be sure you can destroy the enemy, stick your head out.

#### 5. Just run and shoot

This is a trick that most gamers use when being attacked, almost as if running and shooting is reflexive if you directly confront an enemy in front of you, unless you're using Scope. However, the projectile will be reduced to 50% accurately if you have just moved and released the bullet.

So use this tip in case of facing enemies at close range, usually about 10 meters away and should use Shotgun, especially **S12K** because this gun has great damage and has **Auto** shooting mode . Just watch it properly and release the bullet so you can get the enemy into the ark, don't get pissed off.

Here are a few tips to help you control the PUBG Mobile character better, in addition to changing the settings in the Game settings section, you need to combine calmness into your control skills to win. easy.
