

PUBG Mobile: The best gun combos to win the TOP 1 in the game

These are gun combos used by most gamers in PUBG Mobile and are considered to be the easiest to play and easily reserved TOP 1.

In PUBG Mobile or other Battle Royale games, in addition to playing experience, players also have to choose weapons that match their play style, choose the weapon they want, then you need to use it to match suitable for different circumstances.

Especially when in PUBG Mobile, you are equipped with 3 types of weapons including 2 main weapons and 1 sub-weapon, if you have chosen the gun line that suits you then combine them with other guns to fight in each type of terrain, different distances.

Under this article **QuanTriMang** will suggest you some of the most effective weapon combos to fight in all different terrain. Please see and choose for yourself a best weapon combo to "solve" all enemies on your way to TOP 1.

1. Download PUBG Mobile for iOS
2. Download PUBG Mobile for Android
3. Download PUBG Mobile for Windows

TOP the gun combos should be used in PUBG Mobile

1. AR + Shotgun

Why not, AR, maybe most gamers use it, while Shotgun only has a few parts that players need in the game, if any, only in the first time when there is no Loot yet. or SMG only. However, if this pair is combined, it will be quite effective when Shotgun will better complement AR when used at close range, especially **S12K**.

Although AR is also good at this task, but when the lack of ammunition, Shotgun will carry the household, but the Shotgun bullet is never missing when most gamers have AR or SMG, then it will be ignored automatically if seen Shotgun. In general, this combo will work well with players who prefer to operate near to mid-range.

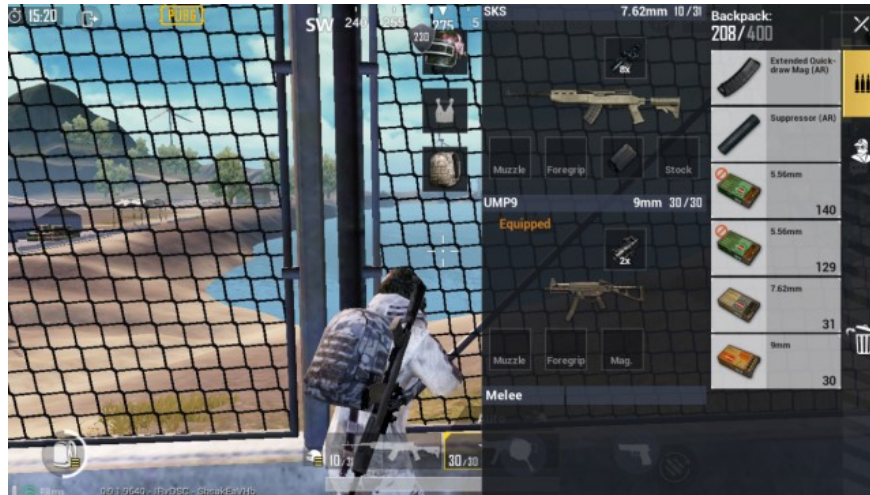

2. LMG + DMR

DMR can be obtained easily, Mini 14, VSS in **Erangel** and QBU in **Sanhok** can all be obtained because the appearance of these guns is not uncommon, while LMG is different. The frequency of LMG is sometimes only 1/3 DMR when there are only two types of M249 and DP-28, but M249 is only available in **AirDrop** so the player only depends on **DP-28** , although this is a combo. Many gamers rated it as highly effective in the game.

If sewing M249 socks while sewing "hearing" then the problem was solved because the M249 uses 5.56mm ammunition and has the highest ammunition box in the game with 100 bullets, otherwise you have to get DP -28 and combined with a DMR using 5.56mm ammunition like Mini 14 or QBU. That combo will support you quite a lot in medium and long range attacks.

3. DMR + SMG

The couple may not be in trouble when the ammunition of SMG you can earn a whole bunch of 9mm and 45.ACP bullets for SMG you can get all over the map because most gamers with AR or DMR give up. all SMG go to get bullet 5 and bullet 7. But it is not difficult to find DMR, but if you have earned SMG, the number of ammunition for DMR is not much.

Specifically, a UMP9 and a Mini-14 or SKS with a ammunition for DMR only need 150 tablets, or a Vector password combined with Mini-14 or QBU or SLR is perfect. The two SMGs mentioned above are all equipped with accessories, so it is quite easy to control them in close range, while the middle range is poured, there is DMR.

4. SR + AR

The perfect duo is here, perhaps this is the most popular combo of all shooter games, not just on PUBG Mobile. **The Sniper Rifle** in PUBG Mobile uses 7.62mm or more bullets, except for AWM only using .300 bullets only in "hearing" boxes, but Sniper Rifle doesn't need much ammunition.

So, you only need to equip about 60 rounds for a **Sniper Rifle** that is too "aggressive", and AR's bullets should use a 5.56mm ammunition gun because if you armed with this bullet, you can stuff it. more bullets in the backpack than 7.62mm bullets, and until the last round, this gun combo still works.

5. SMG + AR

Another "classic" couple is used by many gamers, probably not needing to say much about the duo when SMG and AR are easy to use and are equipped by most gamers in their backpacks. The SMG and AR bullets are easy to make, so that's not a problem with this combo.

However, both are only effective at a little closer or farther, used to "dry", they must not work, so if you want to attack mid-range, you have to change from AR to DMR or Sniper Rifle.

6. AR + AR

The AR combined with AR here is not two guns that use 5.56mm or 7.62mm bullets, must have a 5.56mm bullet and a gun that uses 7.62mm ammunition, this combination is often seen when You don't want to use a Sniper Rifle, DMR or SMG or any Shotgun that comes with that AR.

Most often, it is still a Scar-L, M416, M16A4 or QBZ95 with Groza or AKM, and the other Beryl M762 is very rare and it is not equal to AKM or Groza. And this combo only works effectively in the middle range, only the advantage of this duo is easy to play and where it can be played.

Those are some of the most common gun combos, and rated by PUBG Mobile as the most effective in the game, of course, with each player's play, there will be combo combos of different types. But these are still easy to play and easy to use TOP 1 combos in PUBG Mobile.
