1. Secret cave

This is a place located between Podvosto and Peshkova, but because it has no official name and looks on the map, many gamers will think that this is a normal place and nothing outstanding, so very little People who parachute here. You can go to the northeast of Podvosto for more than 400 meters, you will see this cave, this is a quite narrow area so you must be careful and focus on listening and observing so as not to be attacked unexpectedly.

Inside the cave, the developer arranged a lot of protective gear, recovery items, weapons and ammunition enough for you and your team to have a pretty good start. As for combat experience in this location, you can apply the same as Shelter location on Erangel map.

2. Winery

This location is connected to pretty hot areas such as Volnova, Castle, Tovar, Podvosto. If you don't like these places, you can land on the Winery to get a good start, the amount of stuff here is plenty enough for you and your team to have good equipment.

The Winery's terrain requires gamers to have good observation and listening skills, including many small houses close to each other, in the back divided into many separate small rooms. So if you jump into this area, you should prioritize Shotgun or SMG to suit combat in narrow distances.

3. Dobro Mesto

Dobro Mesto is a big city of Vikendi, just because it is far from the flight path and if bo does not come here it will be a bit hard to run, so the number of people who jump in here is few. In return, this city is also a "well-off" form because the amount of stuff here will make you say "rich".

Because of the distance from the route and many gamers afraid to run from an area on the edge of the map like this, Dobro Mesto is quite deserted. But if someone appears, one is a bot, two are very experienced gamers jumping here to "quickly loot, kill". So even though the location is far from the center, you still have to be alert, pay attention to listening around when loot before finding a means and then "scoot" out of this city.

4. Cosmodrome

The sign of Cosmodrome was the satellite rocket and the giant satellite rocket launcher that had signs of being attacked before. If you do not parachute correctly into this area, you will be easily destroyed soon after, because this is an area that is judged to have a lot of people passing by. Because this is a military area and moving from Cosmodrome to the central area is quite easy, not to mention the amount here is enough for the teams to kill each other.

So if you target this area, be prepared and ready to fight. A little note for you is not to jump into the towering launch pad in this area, there is no furniture there and you will have to take time to jump down there.

5. Cement Factory

There is a simple and closer name to the player who is Cement Factory, this area has many works with many different designs. The topography of this factory is very complicated and if you are new to Vikendi, jumping here will die "suddenly". The gear here is "fertile", gamers can fully exploit and leave without having to walk around anywhere.

Cement Factory also has an advantage for the Sniper, which is quite a high score here, you just need to gamer cover, get a DMR or Sniper with an X6 or X8. Then on the tamarind soup waiting for the "swim" into sight is "euphoria". Extremely suitable for those "Camper" campers.

These are areas with a lot of things for you and your team to loot "boring", but it should be noted that in the above areas there are quite isolated areas and there are quite hot areas. Please choose a place that suits your fighting style to land.
