### **1. Villa**

Villa is located near the center of the Vikendi map, so this will be the focus for gamers no matter where the flight appears, in addition, the central position will help gamers to save themselves when running. wings down to other areas although Vikendi only has 6x6 area.

The terrain in Villa is quite empty, the amount of furniture is quite large, so the possibility of fighting occurs in this place is quite high. So, try to land here as soon as possible before someone else sets foot here.

## 2. Castle vs Tovar

Castle and Tovar are close to each other but too far away for players to jump down here, the area of ??these two areas is quite small but has a terrain that is not convenient to escape, especially Castle. Because it is very likely that gamers want to get out of here, they will have to cross three bridges that are likely to block them.

Although it is quite a lot of hiding places and located right near the center of Vikendi, there are also quite a lot of items, but compared to Tovar, Castle is quite disadvantageous in running. Tovar is smaller in area and if you don't keep up with the loot as soon as you jump down, chances are you'll get in trouble. Be prepared and ready to fight before setting foot in these two areas.

## 3. Goroka

Moving up from Villa a bit to the north is Goroka, which is a somewhat special terrain due to a frozen lake below, above which is a town with many different small buildings with Very good stock. Goroka's position is not far from the center, so what you need to do is just watch carefully before parachuting here.

#### **4. Cement Factory**

The topography of this factory probably takes a lot of time to be familiar, Cement Factory has an extremely complicated terrain and many unexpected elements. You will have to listen, watch carefully if you are in danger.

Loot here, you don't have to worry, the amount and quality of the items here are enough for you to fight back against enemy attacks. There is one thing that the favorite Sniper has is that it has a lot of high points, so if you can get a DMR or a Sniper with an X6 or X8 then you will get "loot". quite a lot of enemies here.

#### **5. Podvosto**

Looking on the map, gamers will associate with Painan area at Sanhok map, only in that, Podvosto has a larger area and not to mention you can walk across the river right on the water because it has frozen, but convenient but also dangerous because the river surface is quite empty, the enemy can stand on both sides and attack you.

And the level here will be enough for you to loot and fight, the area is quite close to the center so it will be noticed by many eyes. If you want to set foot down here, be careful to see if "guests" come down first and which side they will jump first.

## 6. Volnova

Volnova is the only place without snow on this list and connected to many other places. Along with a series of high-rise buildings, squares, and small buildings around, this place has plenty of room to hide.

Volnova is not too far from the center, just a short walk from Castle and Tovar. Furniture is off the table, you loot "full of mouth". In general, this is a quite fierce area, so you need to concentrate so you don't get down before you get out of here.

There are some areas that are considered to be the most fierce fighting on Vikendi, obviously you can see this winter map of PUBG Mobile has quite a number of hot areas close together, so initially the level Vikendi's fighting will be fierce.
