

Qualcomm has 18 partners ready to use its 5G modem next year

Qualcomm has announced that its SnapdragonX50 5G NR product line will be found inside devices manufactured by at least 18 different manufacturers.

Qualcomm has announced that its Snapdragon X50 5G NR product line will be found inside devices manufactured by at least 18 different manufacturers. These companies will use this component to "provide a new generation 5G mobile experience for customers".

1. What is the 5G network?

The Snapdragon X50 5G NR chip will begin to be handed over to partners in 2019 and will help increase the transfer rate to multiple gigabit per second, with significantly lower latency than current 4G LTE networks.

The chip designer said the 5G smartphone will connect to public Wi-Fi without logging in. Qualcomm said these handsets will download faster, browse the web faster, make high-quality video calls, quickly access cloud data and livestream video 360 degrees.

Finally, 5G will bring high-end mobile Internet connectivity, and the company said the next generation of wireless networks will provide "great capabilities to support the demand for unlimited data." User term ". Last October, the chip was successfully tested, achieving download speeds greater than 1Gbps.

"Qualcomm Technologies is committed to helping its partners provide next-generation 5G mobile experiences to customers who want a mobile broadband connection," said Alex Katouzian, senior vice president of Qualcomm Technologies. 5G NR wide activated by 5G NR network, mobile device and Snapdragon X50 5G chip Evidence that we have worked with the most famous OEMs around the world for 3G and 4G LTE Qualcomm Technologies is using Technology leadership team with deep expertise to support the process of launching 5G NR successfully, promoting progress in mobile ecosystems " .

18 manufacturers will use the Qualcomm Snapdragon X50 5G NR modem next year including:

1. Asus
2. Fujitsu Limited / Fujitsu Connected Technologies Limited
3. HMD Global (Nokia phone)
4. HTC
5. Inseego / Novatel Wireless
6. LG
7. NetComm Wireless
8. Netgear
9. Oppo
10. Sharp Corporation
11. Sierra Wireless
12. Sony Mobile
13. Telit
14. Vivo
15. Wingtech
16. WNC
17. Xiaomi
18. ZTE
