

Quick call on the lock screen and Android notification

Currently, Android users are able to make quick calls on the lock screen and notify Android simply and easily. This trick is especially useful when you want to quickly call someone without doing screen unlocking and entering the dialer as before.

Currently, Android users are able to make quick calls on the lock screen and notify Android simply and easily. This trick is especially useful when you want to quickly call someone without doing screen lock operations and entering the dialer as before.

To do this, you will have to rely on the help of the Noti Dialer application - Dial Directly From Lock Screen. Normally, the application helps to create contact shortcuts on the phone lock screen and the notification bar will charge a fee of 17 thousand dong, but it is currently free for users to experience through 23 August 8, 2018. Now join the Network Administrator to learn about this unique and useful calling.

Quick call guide on lock screen and Android notification

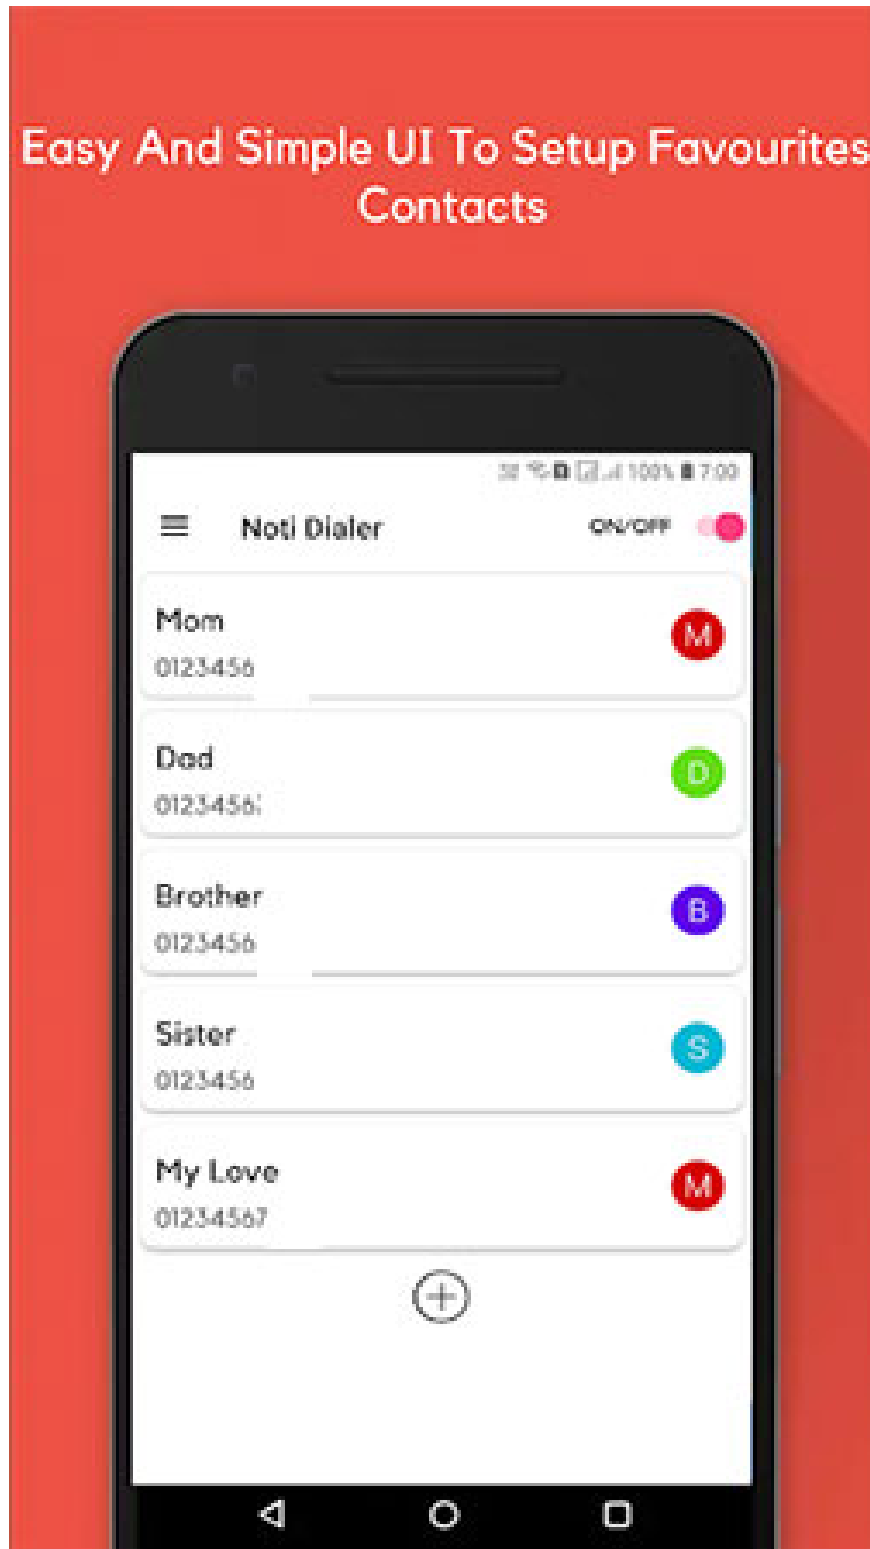

Noti Dialer is like callers, it has fast dialing capability, helps to quickly call important contacts when needed. However, Noti Dialer is much superior when you can make a call right from the lock screen or notification screen without opening the calling application. Noti Dialer works in the background to display the bar that sets the contact shortcut. You can download the application to the device according to the link below to experience.

1. Download Noti Dialer - Dial Directly From Lock Screen for Android

Install the application successfully, start Noti Dialer up. On the first use, click **Allow** to agree to application requirements such as accessing contacts, making and managing calls on the device.

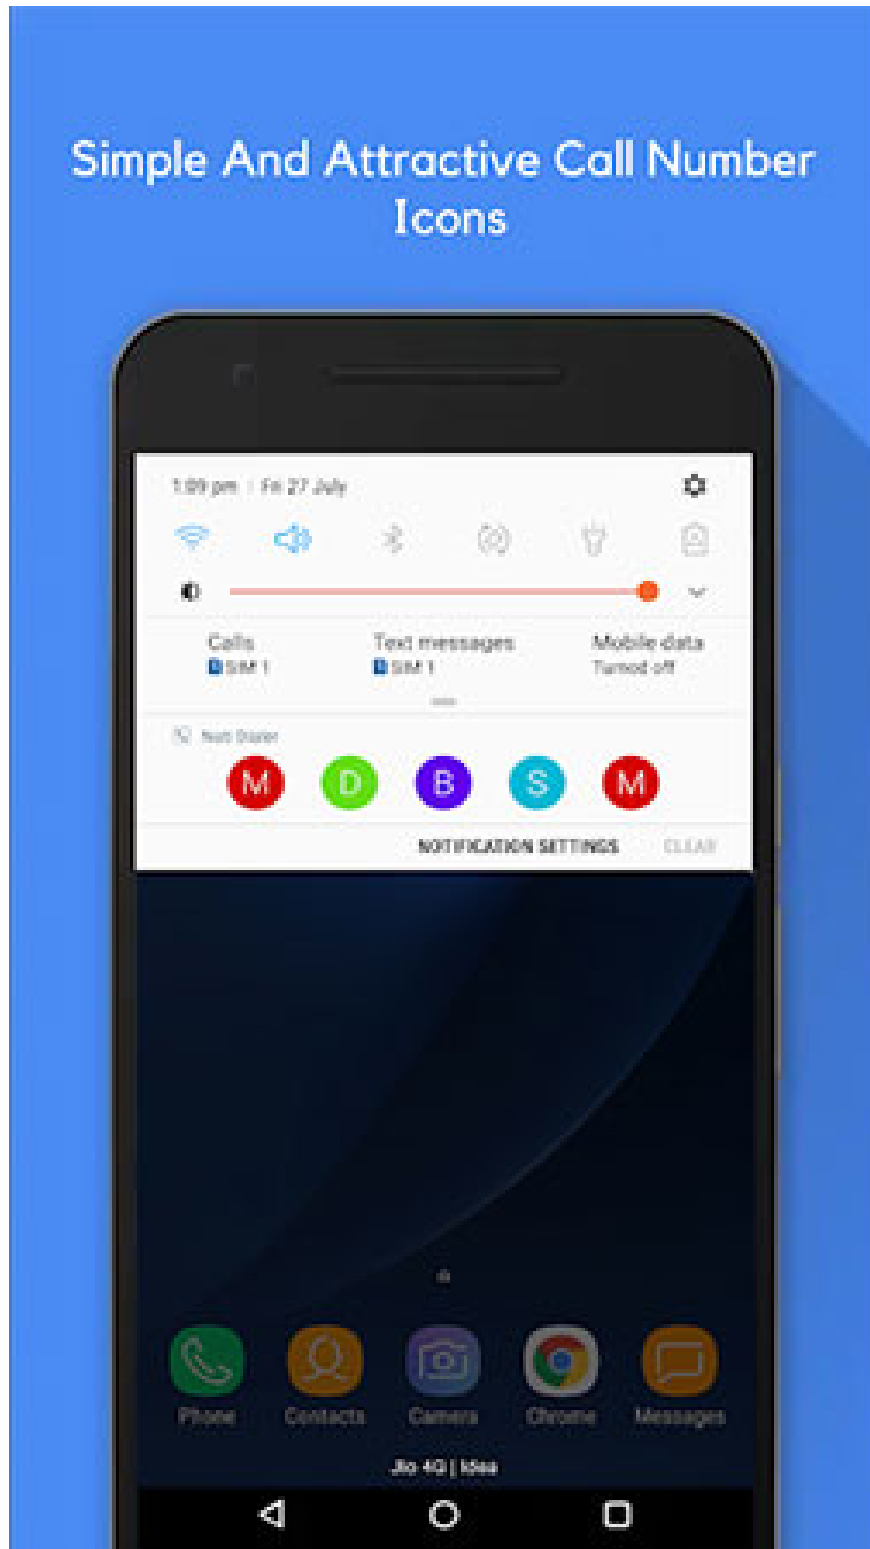

When the main interface appears, select **Select Name**> **select the contact** in the **contact** list to set the shortcut> click **Yes** . Keep doing so to create shortcuts for other contacts. Each contact will have a different color and has the first letter of the character that you put in your contacts to make it easy to identify.

Easy And Simple UI To Setup Favourites Contacts

Next, push the **On / Off** button in the top right corner to activate the feature. It should be noted that if you do not add a contact for the shortcut created it will not be able to activate the feature, so if you do not use it, you should delete it. In addition, the application only allows up to 5 shortcuts, including three built-in shortcuts.

Simple And Attractive Call Number Icons

And as you can see, now a white shortcut bar with the contact's wildcard appears, it will hide and hold in the notification screen, as will the lock screen. From now on, whenever you want to call quickly, you just need to press the wildcard of the contact on the notification screen or make it from the lock screen. It's convenient, right?

You Don't have to even unlock
the phone. Just Click and Call.

We have just learned the fast call steps on Android with the Noti Dialer application. Hopefully this way you will be able to use an effective Android device tip and quickly call the contacts when needed. In addition, for iOS users, calling on the iPhone lock screen is completely possible with the new screen lock feature on the device.

Hope you are succesful.
