

## Quick delivery guide by Lalamove

A fast delivery guide with Lalamove will help you solve the problem of Shipper calling to ship goods

Shipping services are booming in many countries with developed online shopping services, which can be purchased via online shopping applications or simply individuals with products to sell on social networking sites, most is on Facebook. Then the seller will need the courier service.

Lalamove is a support application that users can create very fast and reputable delivery orders, assist sellers to deliver goods when there are far-away customers without people going to ship goods, in addition to delivery, Lalamove also supports people use furniture to move when moving. If you are selling and want to make a fast delivery, follow the instructions in the following article of QuanTriMang to call "Shipper" for delivery.

1. Download Lalamove for iOS
2. Download Lalamove for Android

### Instructions for creating fast delivery orders by Lalamove on the phone

**Step 1:** If you do not have a Lalamove account, please see how to create an account in the article How to create a Lalamove account. When you have an account, log in to the Lalamove app.

First, set up the location where Shipper will receive the goods from you, click on the Delivery Point and drag the orange position pin point to the location you are in, or you can type the correct address with the input box above.

If you want more details, please add the number of houses, floors, room numbers, phone number, contact name to take the **Shipper** to take place, then click on **Set up receiving points**.
