Are you looking for a way to merge videos quickly without having to install additional software? The following article will guide in detail how to join online video on Video Tool Box website <http://www.videotoolbox.com/>

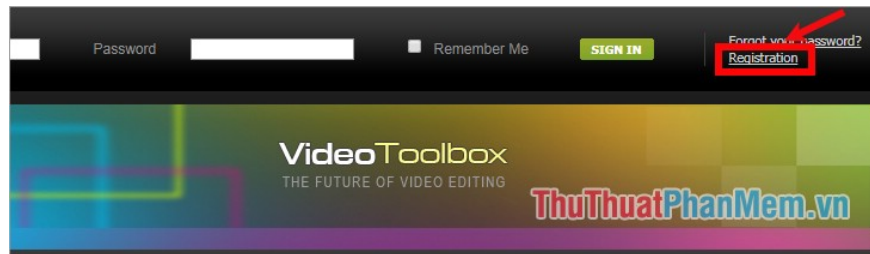

Are you looking for a way to merge videos quickly without having to install additional software? The following article will guide in detail how to join online video on Video Tool Box website <http://www.videotoolbox.com/>

Video Toolbox is a website that helps you edit videos online with many professional features: cut, merge, add subtitles, convert video formats, allow you to choose video sources from computers, Youtube, DailyMotion, . and supports editing many video formats such as 3GB, AVI, FLV . like a professional video editing software. To use Video Toolbox you need to register for an account on Video Toolbox.

Step 1: Register an account on Video Tool Box.

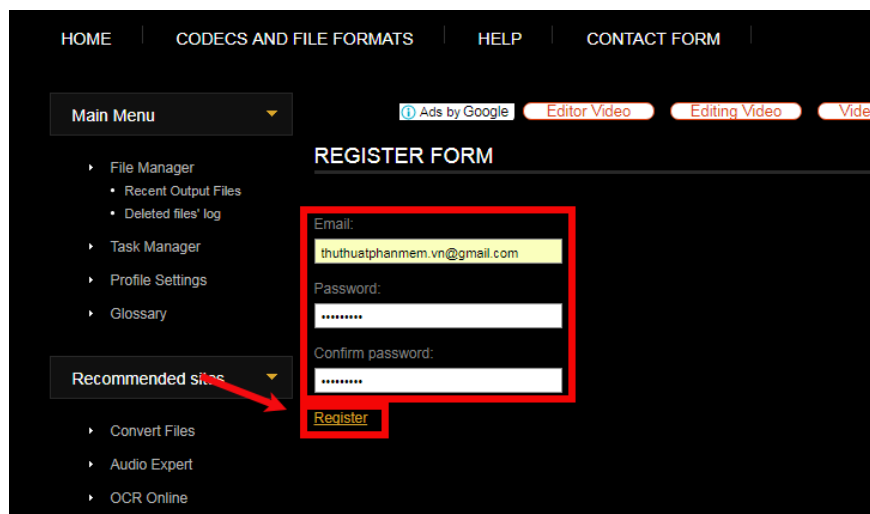

First, you access the Video Toolbox website at the link: <http://www.videotoolbox.com/>, on the homepage interface, select **Registration** to go to the account registration interface.

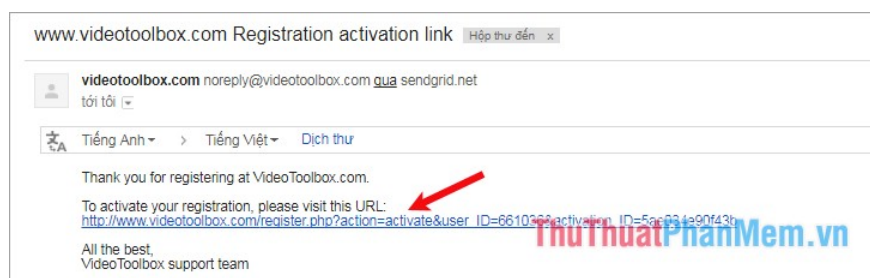

In the **Register Form** you enter some information:

1. Enter your email address in the **Email** box .
2. Create a password in the **Password** box .
3. Confirm the password in the **Confirm password** box

Then click **Register** to register as shown below.

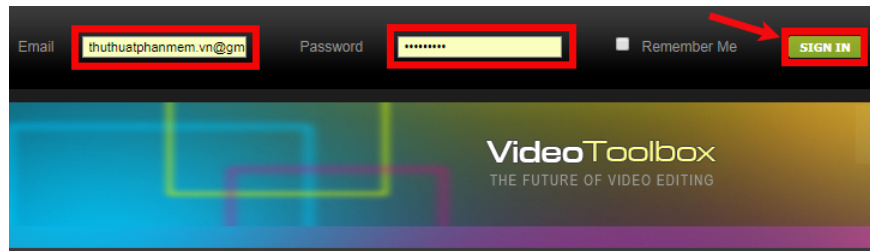

Registration successful message appears (**successful** registration) that you have successfully registered, you log into your registered email account to activate your account on **Video Toolbox** .

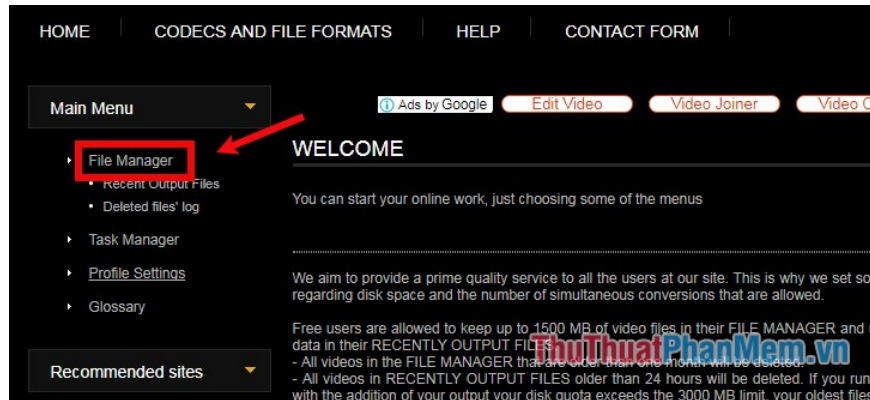

Step 2: Log in Video Toolbox.

Once you have an account, enter your email name and password in the **Email** box , **Password** at the top of the **Video Toolbox** interface and click **Sign in** to login.

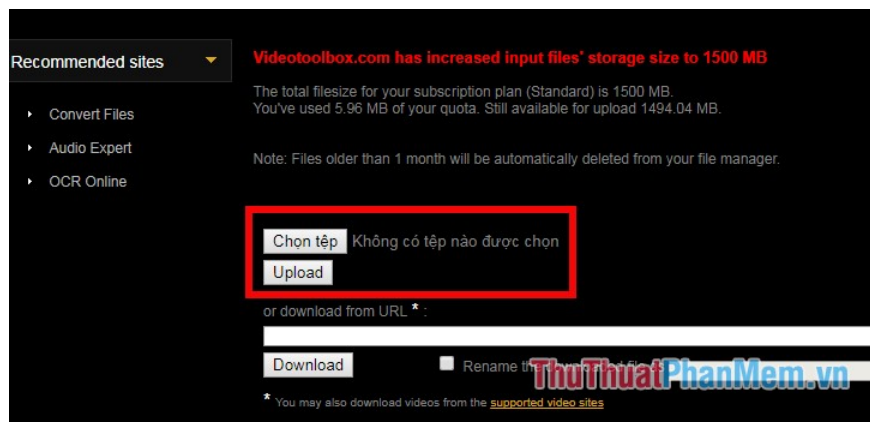

Step 3: Upload videos to the Video Toolbox.

Click **File Manager** in the **Main Menu** to enter the video management page on the **Video Toolbox**.

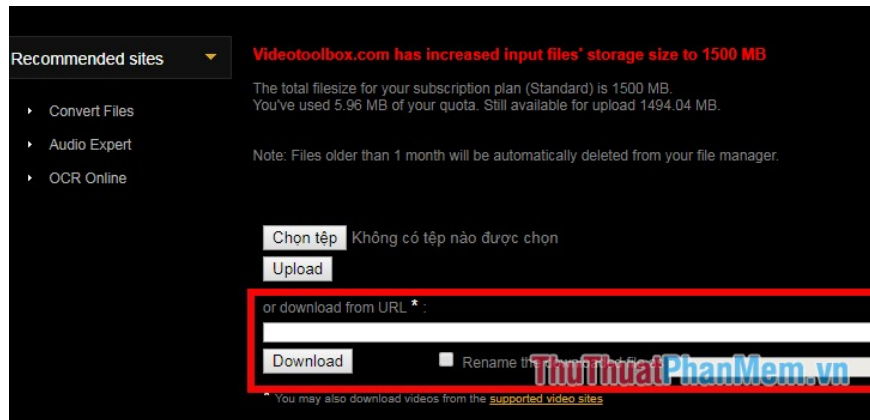

Here you have two options for selecting videos:

1. Select videos from your computer, click **Select files** and select the videos to pair and click **Upload** to upload videos from your computer.

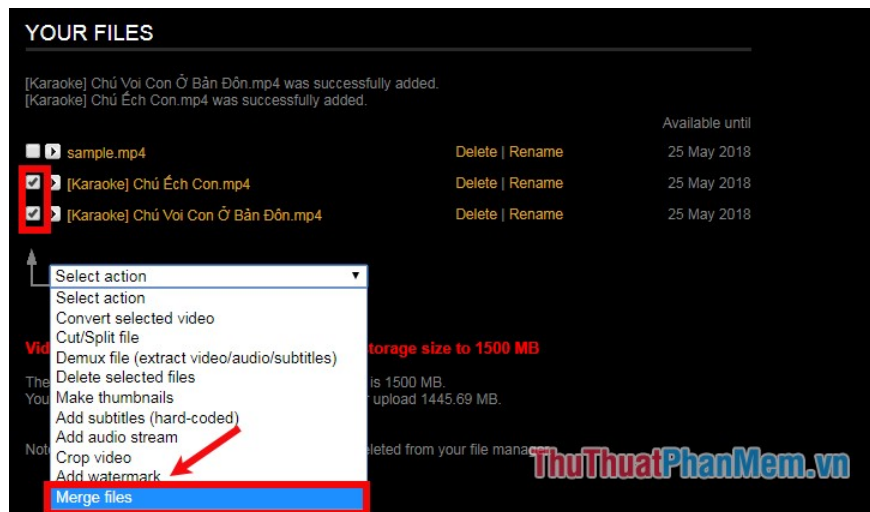

1. Download the video directly on the internet: copy the URL of the video and paste it into the **download from URL** box and click **Download** (you can rename the video file download by clicking **Rename the download** and entering a name in the white box) next).

Step 4: Merge videos.

After the video download process is complete, you will see the videos in **Your Files** section , tick the videos you want to merge then select **Merge Files** (merge files) in the **Select Action** section (select the action).

The **Merge Files** page appears , drag and click and drag the videos above to the bottom as shown below.

Step 5: Download the assembled video to your computer.

After the process of joining the video you can click on **the video name** to download the video to your computer.

Thus, with just a few simple steps, you can join online video quickly without spending any time installing any software on your computer. Good luck!
