

Quickest Tips to Copy Data In Windows with FastCopy

To save time when you want to copy files in Windows, today give you a very good and easy tips to do with FastCopy

FastCopy - saves time and effort when copying on Windows 7

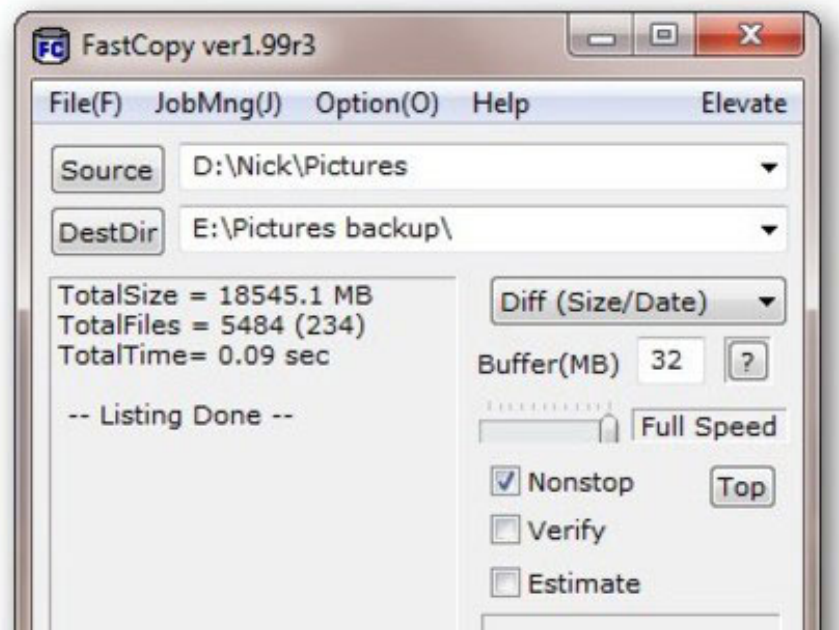

Copying files on Windows 7 is slightly faster than Vista, but with FastCopy, the processing capability of the new generation Windows operating system is even more powerful.

Not really a common utility, but whenever you have to "carry" hundreds of GB when backing up, FastCopy will be an amazingly effective assistant.

Detailed instructions:

- + Run setup.exe file to install normally.
- + When copying, there are 2 items:
 - Source: is the file you want to copy
 - Destdir: where you want to copy the file to.
- Then choose Execute to perform.

FastCopy Compatible with XP SP3, Wsindow7
