

# Quickly create a Bowling game to review knowledge.

If teachers are unfamiliar with using prompts, they can refer to this article to quickly create review games, such as Bowling, on General.

There are many types of games that teachers can create to help students review knowledge in a more engaging way. If teachers are proficient in AI tools, they can quickly create review games on Gemini , or create games using Canva AI . If teachers don't know how to use prompts, they can refer to this article to quickly create review games, such as Bowling, on Genially.

## How to create a Bowling game to review knowledge.

### Step 1:

Teachers can access the General website via the link below and register an account using their Google account.

<https://app.genially.com/>

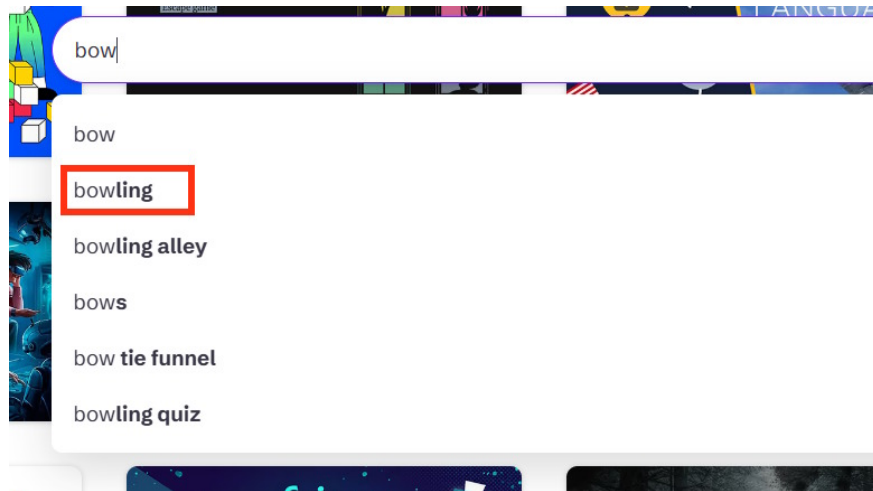

### Step 2:

On the main interface, we select the "Create a game" option to proceed with creating a game.

## Quản Trị Mạng 🖱️ What are you going

This displays the interface of available games on General. Here, we can enter the keyword "bowling" into the search bar to find the game faster.

The results will show you **the bowling game** below; click on the game to proceed with setting up the question.

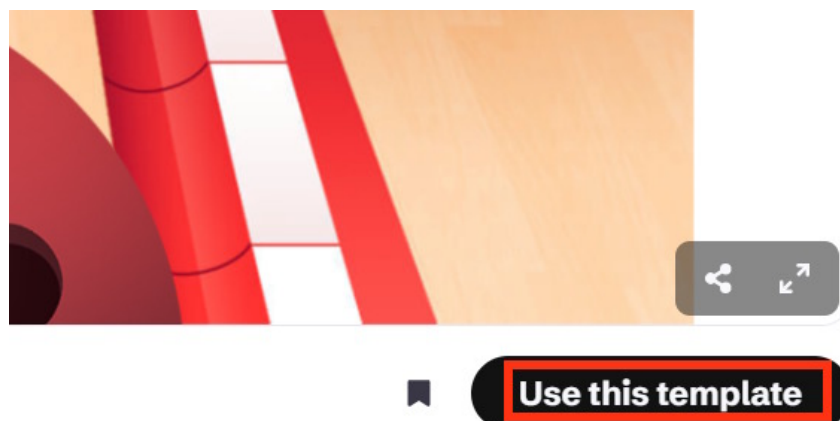

1 templates

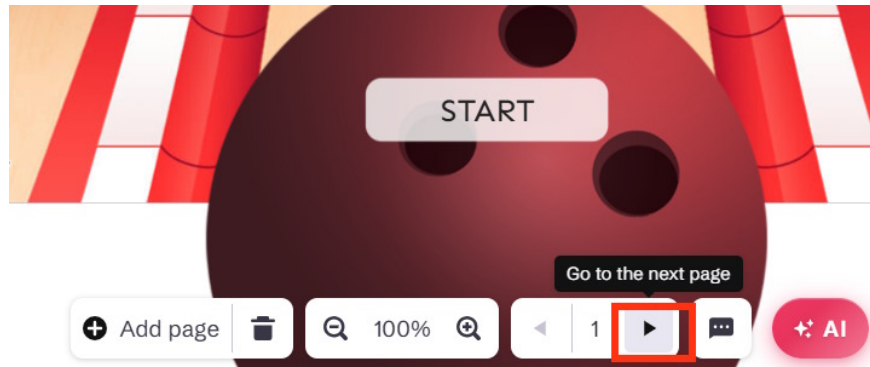

### Step 3:

Go to the bowling game editing interface, **then click "Use this template"** to use this game template.

Click the arrow as shown in the image to go to the page for entering review questions.

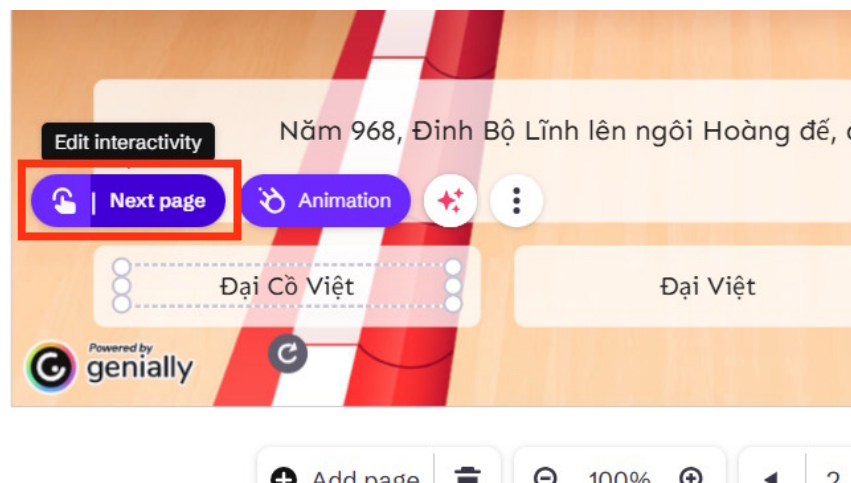

#### Step 4:

Then you will see an area to enter the question content, below which is a box to enter one correct answer and two incorrect answer options. Teachers click on the box to enter the correct content.

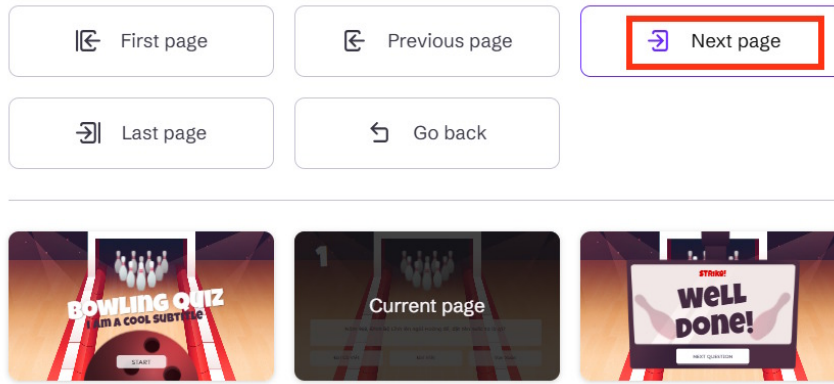

Next, select the correct option and click "Next page".

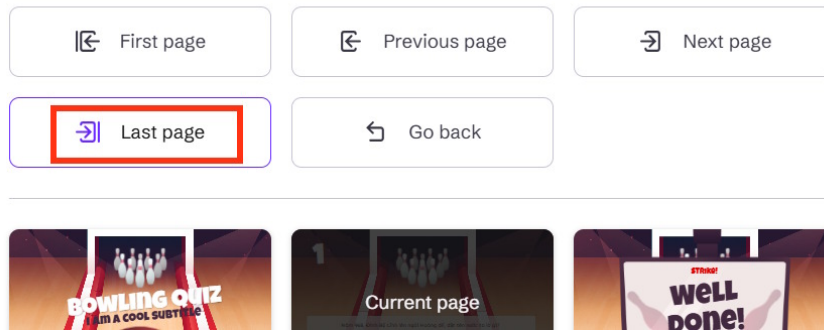

Next, we select "Next page" to set it so that when a student answers correctly, they move to the next page.

### Select the destination page

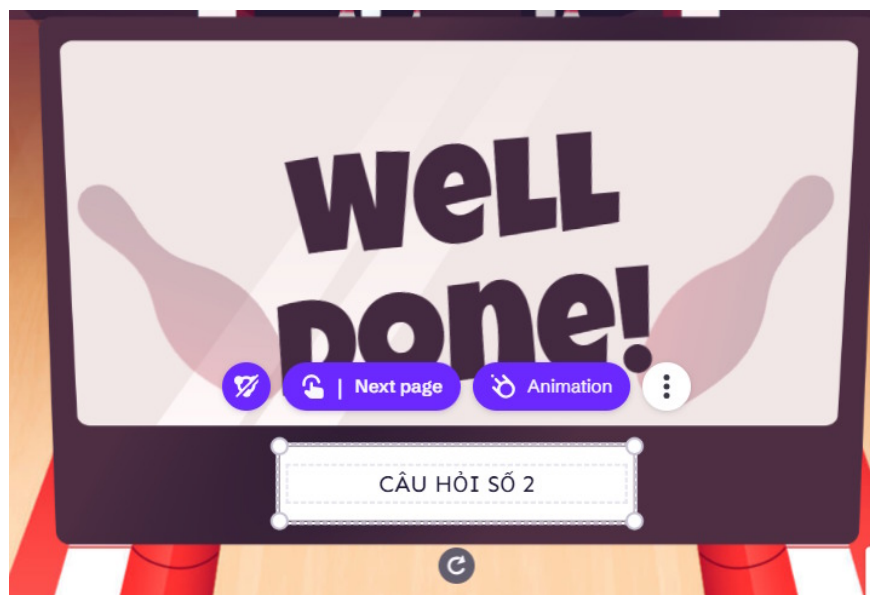

With **the two incorrect answers** currently displayed, teachers **should click on "Last page,"** then select **" Last page,"** and finally **click "Save"** to save the changes.

### Select the destination page

### Step 5:

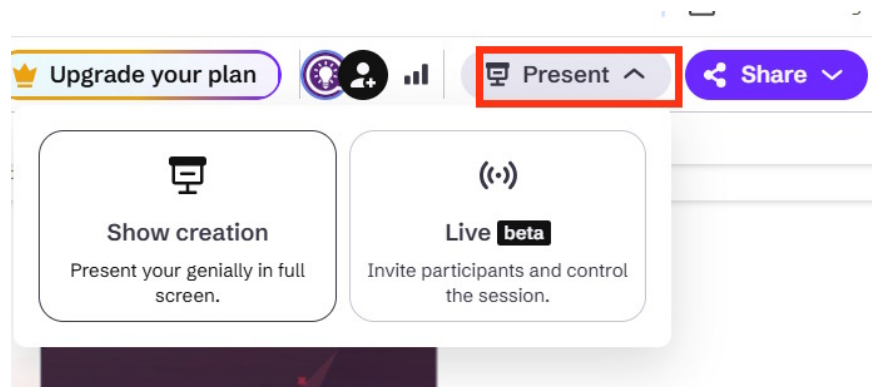

Continue **clicking the arrow to move to the next question page** . At this point, teachers can adjust the question transition interface and enter Vietnamese text as needed.

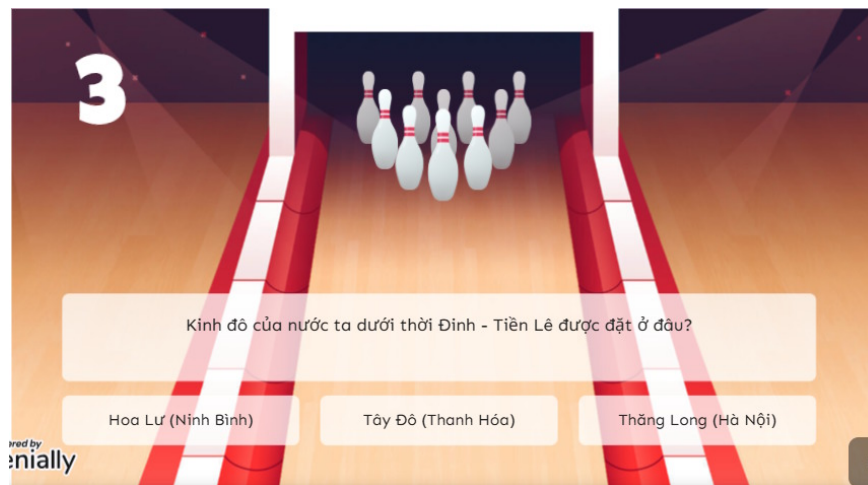

Continue **importing the question pages** you want by following the steps above.

### Step 6:

Once you have finished the set of questions , **click Present, then select Show creation** to create it. Click **Continue** to proceed, and the result will be a bowling game to review your knowledge.

If the answer is correct, the bowling ball will automatically knock down 10 pins arranged in a triangle; if the answer is incorrect, a message will appear and no pins will be knocked down.
