

Quickly open the Control Panel tools

As you know, the Control Panel is the 'control panel', which contains all the tools to change and adjust the configuration of the computer system according to the user. With the following small trick, just enter as the above path: all Control Panel controls will appear as a menu.

As you know, Control Panel is the "control panel", which contains all the tools to change, adjust the configuration of the computer system according to the user. To access Control Panel you must start with Menu Start > Setting > Control Panel , then when this window opens, you can click to select the adjustment tools.

With the following little trick, just enter as the above path: all Control Panel controls will appear as a menu (right next to it) and from there you can double-click on the feature you need. quickly and easily.

- Right-click on the *Taskbar* > *Properties* > select *Start Menu* tab> in the first section " *Start menu* ", click the " *Customize* " button.

- In the "*Customize Start Menu*" window> select the "*Advanced*" tab.
- In the *Start menu Items* dialog - *Control Panel* , check "*Display as a menu*" (means "Display as a list"). Then, click the "*OK*" button to complete this selection.
- Now, when you hover your mouse over the Control Panel item in the Start Menu, you will see a pop-up list, inside the Control Panel's tools, and want to run any tool, just click on the name in the list. This book (note: this way does not apply to Classic Start Menu).
