1. Instructions to create Group, Email group in Gmail

With the help of Google Chrome extension, you can view company domain names and icons of email senders in Gmail Inbox. This gadget will extract the sender's details and display the company's favicon icon.

Gmail is a very successful email service. Today, millions of people are using Gmail accounts to send and receive emails. And more than a billion Gmail users use this mailing service daily but are not aware of the hidden feature in Gmail. This article will show you how to add a company domain name and sender icon to your inbox.

View company domain names and icons of Email senders in Gmail Inbox

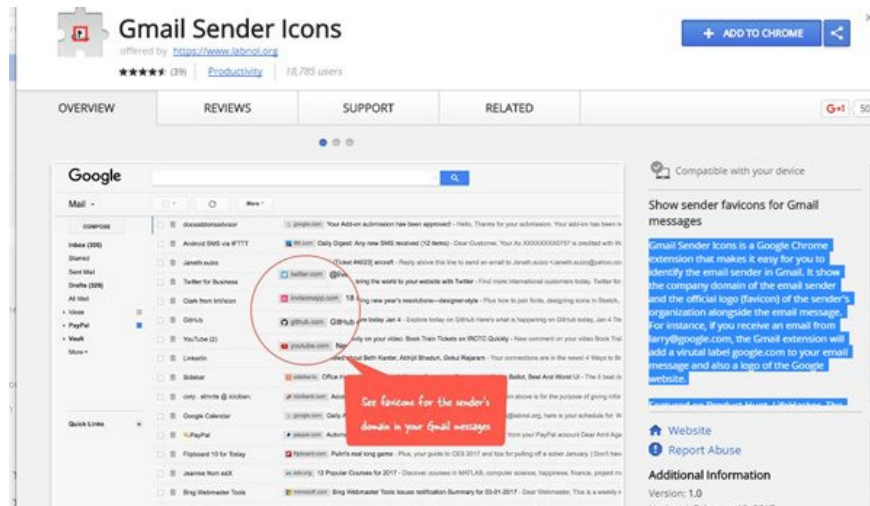

Most users use the Google Chrome browser and have tried many great chrome extensions with many new features for the browser. And in this section, you will use one of those utilities. Do not panic if you do not know about Chrome extension because the article will provide detailed step by step instructions to help you install and use this extension easily. So follow the steps below.

Something about extension:

1. Gmail Sender Icons is a Google Chrome extension that helps you identify email senders in Gmail easily. It shows the sender's company domain name and the official logo (favicon) of the sender organization next to the email. For example, if you receive an email from larry@google.com, Gmail's extension will add a virtual label google.com to the email and the Google website logo.
2. The sender's favicons and domain names are displayed on Gmail both in search results. It applies to most sender's labels and actual email labels remain the same.
3. Gmail Chrome extension uses Google S2 service to create the site's favicon while Gmail messages are parsed with Inbox SDK Framework. All processing is done in your browser and does not share or download Gmail data anywhere.

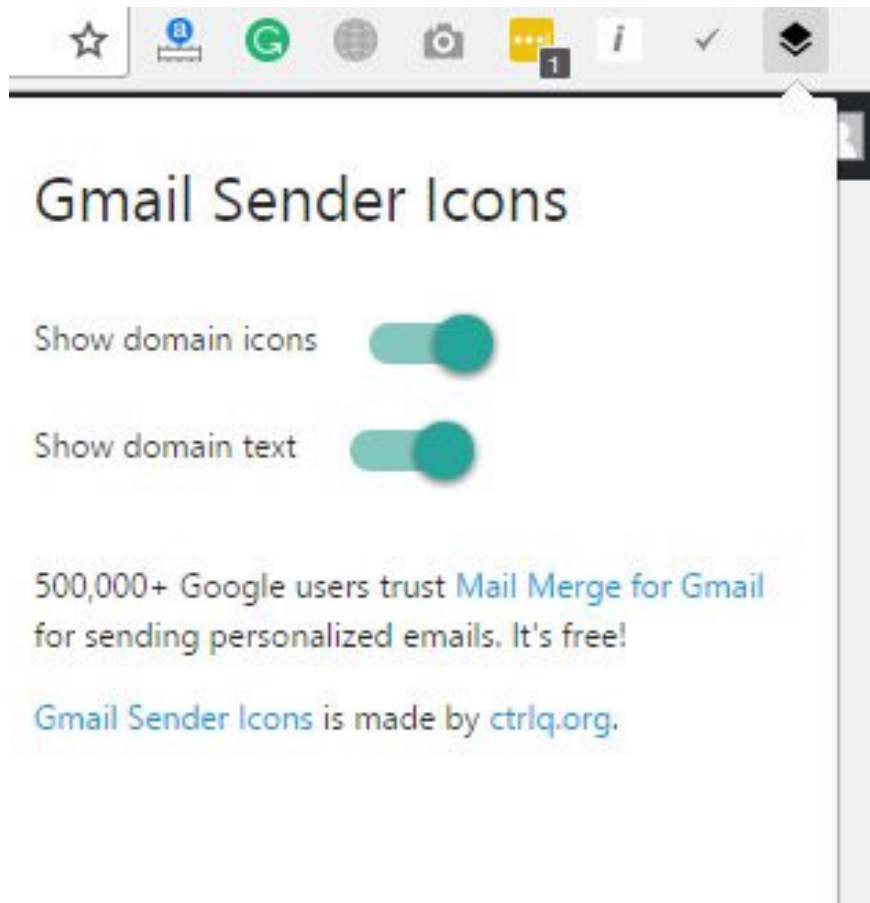

How to install and use Gmail Sender Icons in Gmail:

1. First of all, you need to download and install Gmail Sender Icons, the extension will extract the sender's details and use it to display the favicon.

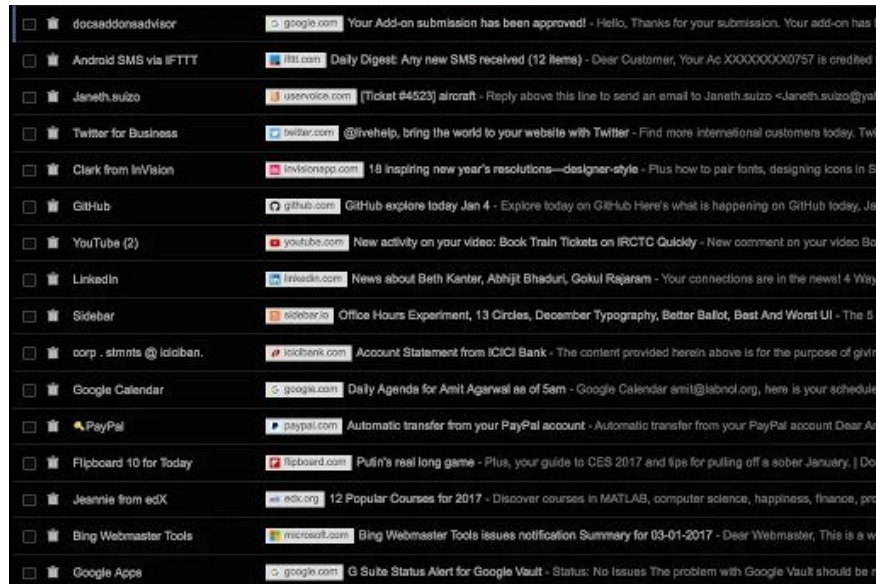

2. Simply access the link and click ' **Add to chrome** ' to download the extension. After a few minutes, the extension will be added to the browser and you will see a black icon in the right corner.

3. Now just click on the icon and turn on both options.

4. Open Gmail mailbox and you'll be surprised to see the company logo in front of each email.

So with just a few simple steps you can easily manage email and identify senders. This is also useful for detecting spam emails in your account. Hope you find these guides useful and shared with others.
