

Quiz: What causes Wifi network slow?

With the continuous development of technology, the use of wireless networks is becoming more and more popular. However, connecting to the internet using wi-fi is not always easy, especially if the speed of access may be severely reduced despite the use of strong connections. Find out about some of the causes of this situation through the quiz below!

1. Question 1. Is the transceiver (repeater) connected to the main router via Wi-Fi or better network cable?
 1. Via Wi-Fi
 2. Through wired connection
2. Question 2. How does crowded places affect Wi-Fi broadcast range?
 1. Help amplify stronger waves
 2. Reduce the range
 3. No effect
3. Question 3. Do devices that open Bluetooth connections affect Wifi waves?
 1. Influential
 2. No effect
4. Question 4. Many devices connected but not on the Internet do slow down, destabilize the Wi-Fi network?
 1. Have
 2. Is not
5. Question 5. How does the microwave oven near the Wi-Fi transmitter affect?
 1. Increase the ability to broadcast
 2. Reduce the possibility of broadcasting
6. Question 6. Does the weather often affect the quality of the Internet connection of the provider?
 1. Only ADSL effect
 2. Optical fiber only (FTTH)
 3. Influence both
 4. No effect
7. Question 7. Does the location of Wifi affect the transmission line?
 1. Influential
 2. No effect
8. Question 8. Where to set Wifi to get the best transmission quality?
 1. Next to electronic devices such as televisions, microwaves, refrigerators
 2. Where to put it
 3. Electronic devices should be avoided
9. Question 9. Is it necessary to connect computers to computer networks?
 1. Entertainment
 2. Sharing printers, software
 3. Copy the volume of information
 4. Share resources
10. Question 10. In the following computer network statements, which statements are correct?
 1. Computer networks are computers that are connected to each other.

2. Computer networks include: computers, network equipment to ensure connection, software that allows communication between machines.
3. Computer network includes: computers, network, network adapter
4. Computer networks include: computers, network, network adapter, hub
