

# Rage 2 player configuration on the computer

This article will be introduced through the game RAGE 2 and the configuration of playing RAGE 2 on the computer

RAGE 2, the sequel to the RAGE story released in 2011 has been disappointing for gamers, and is it after all these years that RAGE 2 compensates for what the RAGE lacks in its debut? Here are some introduction to RAGE 2 and configuration of RAGE 2 play on the computer.

1. Configure play Tom Clancy's Ghost Recon: Breakpoint
2. Configuring Mortal Kombat 11 on the computer
3. Configuring Seriko Shadows Die Twice on computer, laptop

## Play configuration RAGE 2 on the computer

Talking about the RAGE 2, this is a first-person shooter (FPS) set in the post-apocalyptic world destroyed by an attack from an asteroid. Like many other games, you will be playing the role of the main character and this guy named Walker, is tasked to regain justice for the post-apocalyptic world.

Much of the open world gameplay, characters and missions that everything else is created by developer Just Cause. And the control and action mechanism is designed by **id Software** . This unusual combination is the decision of the publisher Bethesda, and it has had certain effects and first impressions.

Weapons with vehicles in the game are very diverse and rich, along with the available skills of Walker character. Players will enjoy the spectacular shooting racing.

RAGE 2 also supports players with cheat codes, players will have the advantage of being able to electrify any enemy who comes too close or summons Klegg Clayton to be a companion.

On the PC version there will be a few more priorities compared to the PS4 or the Xbox One through unlimited frame rates. Adjust the viewing angle accordingly and do not need to own a high profile for gamers to experience. The following is the minimum configuration and required configuration of RAGE 2.

### **Minimum configuration for playing RAGE 2 on the computer**

1. **Operating system:** Windows 7, 8.1 or 10 (64-bit)
2. **CPU:** Intel Core i5-3570 or AMD Ryzen 3 1300X
3. **RAM:** 8GB
4. **Graphics card:** Nvidia GTX 780 3GB or AMD R9 280 3GB
5. **Hard drive capacity:** 50GB of free space

With the minimum requirement of RAGE 2 being 8GB of RAM, i5-3570 and GTX 780 3GB GPU, this is an average configuration that can help you experience stability with RAGE 2, at least at 720p.

### **Configuration required to play RAGE 2 on the computer**

1. **Operating system:** Windows 7, 8.1 or 10 (64-bit)
2. **CPU:** Intel Core i7-4770 or AMD Ryzen 5 1600X
3. **RAM:** 8GB
4. **Graphics card:** Nvidia GTX 1070 8GB or AMD Vega 56 8GB
5. **Hard drive capacity:** 50GB of free space

And to experience the RAGE 2 with a High Settings graphics level, you will have to own a decent configuration when the request is now i7-4770 and GTX 1070. And 8GB of ram can still help you cover experience sharp graphics. However, if you want the smoothest experience, please increase the RAM capacity to 16GB.

Above is an introduction to RAGE 2 and a configuration of RAGE 2 play on the computer, hopefully this configuration will help gamers build a suitable configuration for the best experience with RAGE 2.
