

# Razer announces two new Basilisk gaming mouse models with 'terrorist' battery life

Razer today announced two new names for its Basilisk mouse lineup: Razer Basilisk Ultimate and Razer Basilisk X HyperSpeed.

Razer today announced two new names for its Basilisk mouse lineup: Razer Basilisk Ultimate and Razer Basilisk X HyperSpeed. Both of these mice are equipped with the latest Razer HyperSpeed technology to deliver excellent wireless signal performance with extremely low latency.

However, that is not the most prominent feature on Basilisk Ultimate and Basilisk X HyperSpeed. Factors particularly impressive on these two products is battery life "cattle". Specifically, Basilisk X HyperSpeed can provide maximum battery life up to 285 hours, higher than any wireless gaming mouse model available on the market today. In that atmosphere, Basilisk Ultimate can serve you for up to 100 consecutive hours - although much inferior to Basilisk but overall still very impressive.

The new Basilisk Ultimate mouse is equipped with an advanced Focus + 20K DPI optical sensor, which supports many new features such as Smart Tracking, Asymmetric Cut-Off and Motion Sync, all of which greatly improve accuracy in each manipulation. Like other Razer products, the Razer Chroma in this mouse model will allow you to customize up to 16 million colors.

## Basic specifications of the Razer Basilisk Ultimate:

1. 20,000 DPI Focus + optical sensor with 99.6% precision resolution
2. HyperSpeed wireless technology
3. 11 independent programmable function buttons
4. Razer™ Optical Mouse Switches with a lifespan of 70 million clicks
5. Razer Chroma™ RGB 14 light zones with 16.8 million customizable colors
6. Use mode wired and wireless
7. Dongle 4GHz
8. Compatible Razer mouse dock
9. Battery life: About 100 hours (without lighting) (Battery life depends on the usage setting)
10. Weight: 107g

## Price:

1. Razer Basilisk Ultimate & charging dock: \$ 169.99
2. Razer Basilisk Ultimate: \$ 149.99
3. Charging dock: \$ 49.99 USD
4. On shelves from November 6, 2019

### Basic specifications of Razer Basilisk X HyperSpeed:

1. Advanced Razer 5G optical sensor with 16,000 DPI
2. HyperSpeed ??wireless technology (using Dongle 2.4GHz)
3. Dual wireless modes (2.4 GHz and BLE)
4. 6 independent programmable function buttons
5. Razer™ Optical Mouse Switches with 50 million clicks lifespan
6. Razer Synapse 3
7. Battery life: Up to 285 hours (2.4 GHz), 450 hours (BLE) with AA batteries included.
8. Weight: 83g

**Price:** \$ 59.99, on shelves from November 6, 2019
