Have you ever wanted to receive notifications about comments and activities of a particular user on Instagram? It could be your friends, or someone you idolize, etc. Now you can enable and receive notifications from specific user actions on Instagram easily and quickly. fast.

Receive notifications of new posts from users on Instagram:

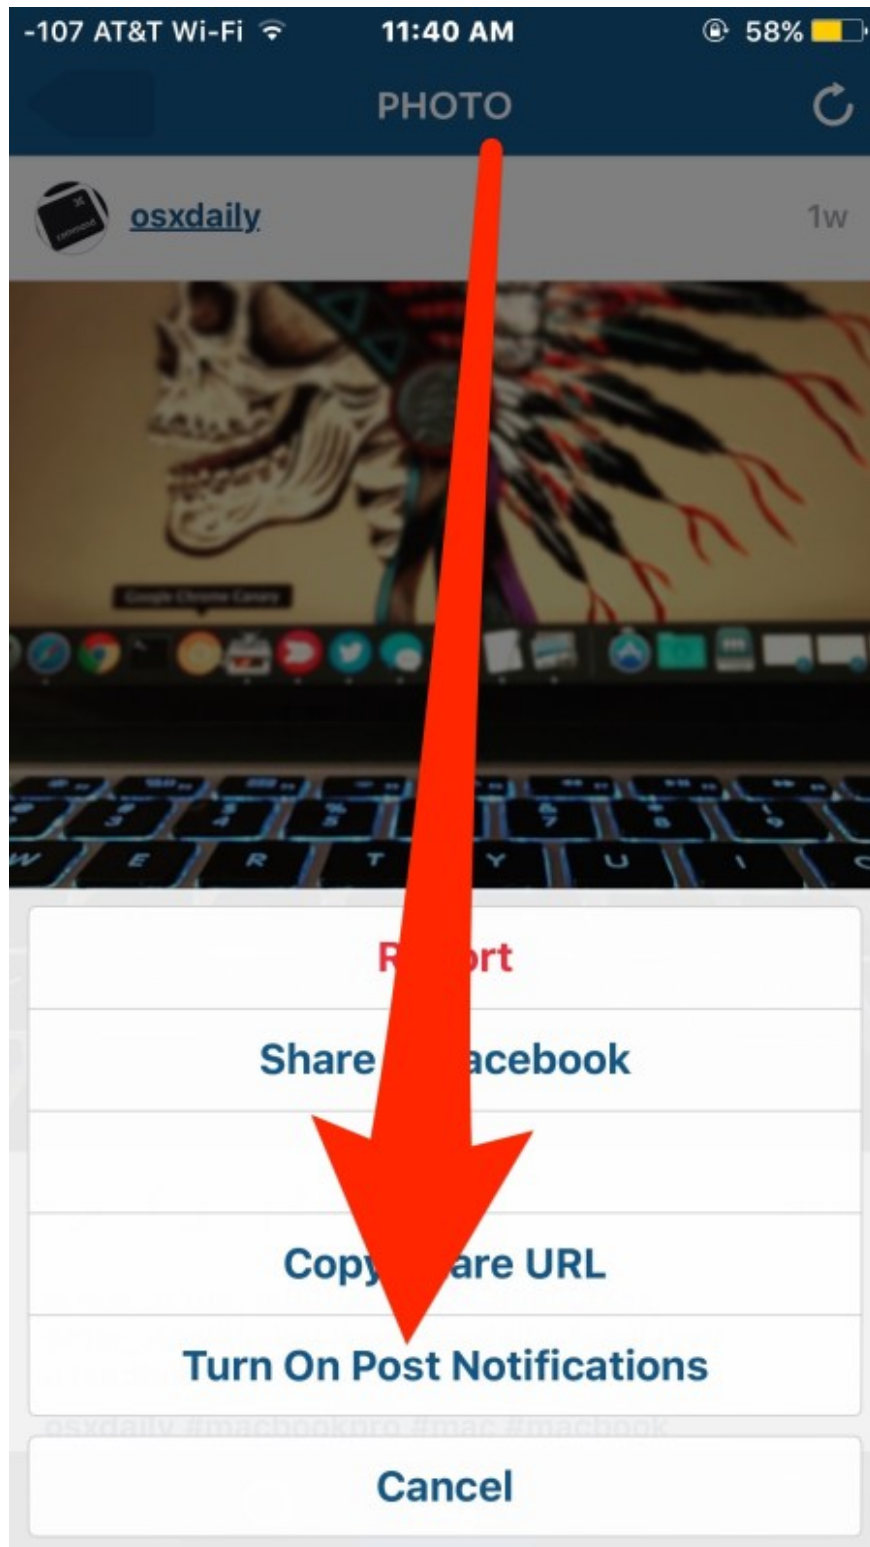

The feature to receive notifications of new postings on Instagram works on both iOS and Android. In the instructions below, Network Administrator will show you how to set up notifications when new postings are

posted by an Instagram user on your iOS device.

1. Open Instagram and find users you want to receive notifications every time they have new activity on Instagram.
2. Under the image posted on Instagram of the user you want to receive notifications, click the 3 dots icon.

3. Click the **Turn on Post Notifications** option .

Now a small gray bar will appear in the top corner of the Instagram window to let you know that the notification feature has been activated. And whenever Instagram users post something new on Instagram, you'll get a notification.

You can enable notifications from any account you want, whether it's a public account or a private account, as long as you can see their posts.
