

Recently launched, Huawei Mate 30 Pro rookie is always the best smartphone photography in the world

Mate 30 Pro has officially overtaken Samsung Galaxy Note 10 Plus to become the smartphone model with the most impressive camera in the world.

After a long time of countless rumors, leaked images, and even controversy, in the end, the flagship model was responsible for 'breaking' Huawei's high-end smartphone market - Mate 30 Pro - with loads of notable improvements both in terms of design and hardware.

Leaving aside the fuss about software with the absence of Google services and applications, it is clear that the hardware improvements that Huawei brings to the Mate 30 Pro, especially in the camera cluster. After, in a latest announcement, Mate 30 Pro has officially overtaken Samsung Galaxy Note 10 Plus to become the smartphone with the most impressive camera in the world so far. now, according to DxOMark's prestigious mobile camera ranking criteria.

1. Huawei Mate 30 - Mate 30 Pro: Impressive specifications, perfect design, great features, but without Google

Mate 30 Pro has become the smartphone model that owns the most impressive camera in the world

Accordingly, Huawei Mate 30 Pro has achieved a total score of 121, now considered 'unprecedented', surpassing the record number of 117 points of the Galaxy Note 10 Plus launched nearly 2 months ago. However, this is still information that may frustrate Huawei's management because its original plan was to create a camera cluster

after 4 lenses that could achieve a higher score in the mobile camera ranking system. action of DxOMark.

1. What does the 'super slow' 7680fps movie recording feature on the Mate 30 Pro do?

Huawei Mate 30 Pro rear camera clusters achieved a total score of 121 according to DxOMark

According to the announcement from DxOMark, the score of 121 that Huawei Mate 30 Pro achieved has a great contribution from the score 131 in the Photo category, more than 5 points compared to the 'former king' Samsung Galaxy Note 10+ 5G. The Mate 30 Pro offers great results in almost every type of still image, but there are times when the texture and noise handling issues are sometimes encountered.

However, Huawei fans probably still cannot be satisfied by the most popular new smartphones in the past 2 weeks: iPhone 11, 11 Pro, 11 Pro Max, also received many valuable improvements. camera, has not been formally evaluated. Let's wait and see how long Mate 30 can hold the number 1 position in DxOMark's list of world's best photography smartphones!

1. Apple counts Android world for mobile photography with a host of quality additions to the iPhone 11

Huawei Mate 30 owns the rear camera cluster with extremely impressive specifications

Huawei Mate 30 has a Leica-branded rear camera cluster with 1 main camera with 40 megapixel resolution with F / 1.8 aperture, 1 ultra-wide-angle 40 megapixel lens with F / 2.2 aperture, 1 8 megapixel telephoto lens with F / 2.4 aperture and 1 3D depth.

1. Still able to install and run Google applications and services on Huawei Mate 30/30 Pro
