

Recover deleted photos / data on iPhone, iPad

Share easy ways to recover deleted photos and data on iPhone / iPad. Simple restore, anyone can get it back

Simple recovery operation, anyone can get back deleted photos / data on mobile device after viewing this article.

Usually the deleted data cannot be retrieved. However, when using add-on software, it will be easy to find the deleted data again. Here's how.

1. Temporary deletion and permanent deletion

Delete (delete) pictures / data usually has 2 stages:

1. The first step: Temporarily delete - The photo will be moved to the trash, where it can be reviewed and restored.
2. Second step: Erase forever - You can also delete them immediately by going to deleted photo / recycle bin -> Select photo / data and delete it permanently.

If you haven't done this yet, the pictures will be stored in your computer's trash for an indefinite time. As for mobile devices, iOS default photos after 30 days in the trash will permanently delete.

However, what if we accidentally delete precious photos forever. In this article, Freetuts will guide you to recover photos, videos and data on iPhone, iPad even after permanently deleted.

In addition, if you lose your phone, it is temporarily considered data loss, if your iPhone / iPad is logged in iCloud and synced, you can visit <https://www.icloud.com/> to get data quickly. whether

2. Two ways to retrieve deleted phone photo data

First, use EaseUS iPhone Data Recovery software.

IOS / IPad: Using EaseUS iPhone Data Recovery (Windows)

Step 1: Download the software at the homepage [here](#).

Step 2: Proceed to install.

Select language -> Press **OK** to start the installation.
