

# REDMAGIC 10 Pro launched globally: Superior power with Snapdragon 8 Elite, 7,050mAh battery

On December 3, 2024, REDMAGIC 10 Pro was officially launched with a series of improved technologies, bringing unlimited power to global gamers.

## Superior power breaks all limits with Snapdragon 8 Elite

If previous generations have impressed users, REDMAGIC 10 Pro can do even more. With an AnTuTu score of up to 3,291,328, REDMAGIC 10 Pro sets a new standard for game and application performance, ideal for heavy and graphics-intensive games.

The smartphone is powered by the latest Snapdragon 8 Elite chip, which is more powerful with 45% more performance and 44% more battery efficiency than the previous generation. The octa-core architecture, clocked at 4.32 GHz, is combined with up to 24GB of LPDDR5X Ultra RAM (13% faster and 30% more energy efficient) and up to 1TB of UFS4.1 Pro storage (36% faster read speed).

Along with that, the phone is equipped with the RedCore 3 Chip developed by REDMAGIC to enhance AI interpolation and super resolution, making the game smoother while intelligently managing energy and temperature.

## 1.5K AMOLED 144Hz display: Sharper and faster than ever

With REDMAGIC 10 Pro, the screen is not only larger but also sharper and smoother. The 6.85-inch size with exclusive AMOLED technology from BOE provides a resolution of 1.5K (2688 x 1216 pixels), providing

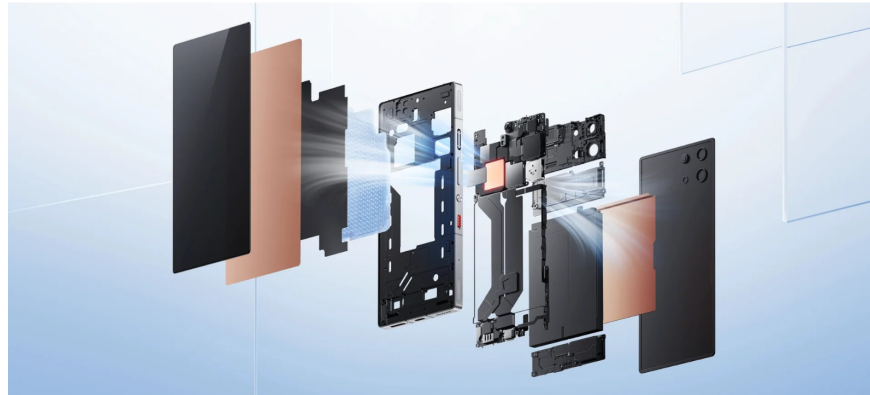

extremely vivid and detailed images.

In particular, the 144Hz refresh rate, 2,000 nits maximum brightness and HDR10+ support, the screen provides vivid images and precise touch response, upgrading the immersive gaming experience. Along with that, the 2,500Hz touch sampling rate provides lightning-fast response. Whether it's intense combat or smooth movement, all your operations are accurate to the millisecond.

### **Advanced cooling technology with ICE X**

The Red Magic 10 Pro is the first smartphone to use liquid metal cooling technology. The ICE X cooling system combines liquid metal technology with a thermal conductivity of up to 80 W/mK, reducing core temperatures by up to 21°C, 19 times more effective than traditional cooling materials. This ensures the processor operates stably for long periods of time without overheating, which is essential for professional gamers.

The Red Magic 10 Pro's cooling system features an 11-layer cooling structure, including an upgraded vapor chamber, graphene layer, and aerospace-grade materials. Airflow is improved thanks to high-precision shark fin fan blades that spin at 23,000 rpm, allowing the fan to operate quietly at just 4 dB. Customizable RGB fan lights not only add personality but also support efficient heat dissipation.

### **Huge 7,050mAh battery, impressive gaming performance**

One of the biggest upgrades on the REDMAGIC 10 Pro+ is the 7,050mAh battery, significantly larger than the previous generation. Combined with smart charging technology, you can rest assured to play games all day without worrying about interruptions.

In addition, REDMAGIC 10 Pro is also equipped with outstanding features for gamers including: 520Hz shoulder buttons with 7.4ms response time, ideal for eSports matches; Z-Smart Cast allows wireless screen projection at speeds up to 120FPS, perfect for livestreaming or sharing content; Vivid 4D vibration, simulating in-game action feedback.

### **50MP camera system, vivid sound and futuristic design**

Despite being a gaming phone, REDMAGIC 10 Pro still owns an extremely impressive triple camera system that meets both creative and gaming needs, including a 50MP main camera with OIS optical image stabilization technology, 7P coating; 50MP OV50D ultra-wide-angle camera and 16MP under-screen front camera.

The REDMAGIC 10 Pro is equipped with dual 1115K speakers and three built-in microphones, delivering full-range 3D audio certified by DTS:X Ultra, enhanced by Qualcomm Snapdragon Sound technology. This makes the audio experience when playing games or watching movies reach premium standards.

REDMAGIC 10 Pro still retains the flat back design that eliminates the camera bezels, but is now upgraded with 30% increased transparency, creating an impressive and powerful appearance. The thinness is also optimized, providing a comfortable, sophisticated grip. The device has three personality color options: Midnight Black, Twilight Gray, Moonlight Silver

**Expected selling price in Vietnam**

In Vietnam, users can pre-order the genuine REDMAGIC 10 Pro from December 20 and officially own it from December 26 through exclusive distributor Hoang Ha Mobile with the following prices:

- 12GB/256GB version - Midnight Black: Listed price 21,990,000 VND, expected retail price 17,990,000 VND.
- 16GB/512GB version - Twilight Gray/Moonlight Silver: Listed price 23,990,000 VND, expected retail price 21,990,000 VND.

Built on a 10th generation platform, the REDMAGIC 10 Pro delivers superior power, breakthrough technology, and an unrivaled gaming experience. This is the gaming smartphone that gamers deserve to own this holiday season.
