Optimize Files Image

Instructions on reducing image size using FILEminimizer Pictures

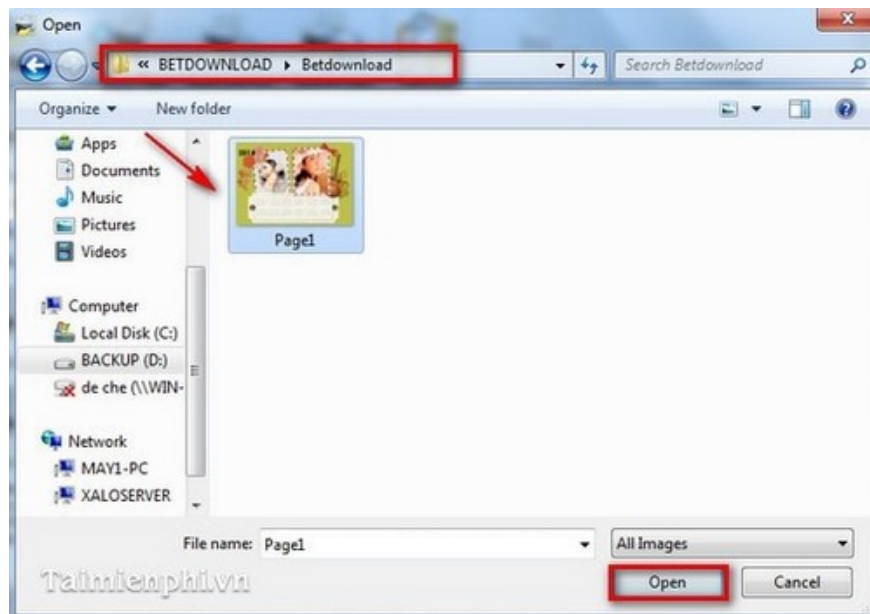

Step 1 : Download and install the software.

- You can download the latest version of FILEminimizer Pictures here: **Download FILEminimizer Pictures**
- Installation: It's quite simple, just follow the instructions.

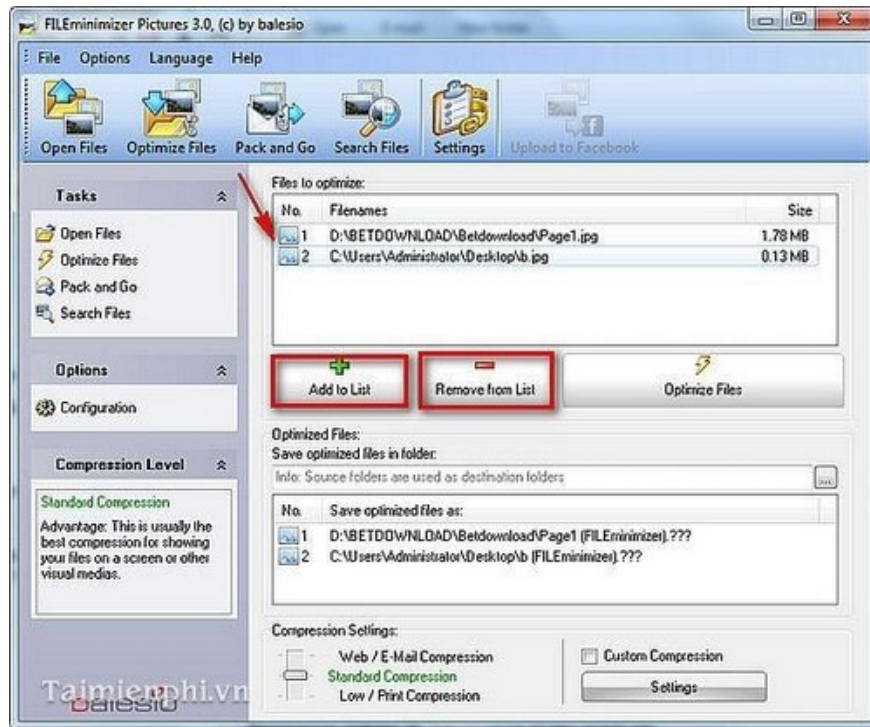

Step 2 : Launch the program. On the main interface of the software, click **Open Files** (or select **Open Files** in the **Tasks** section) to open the image file you want to reduce the size of.

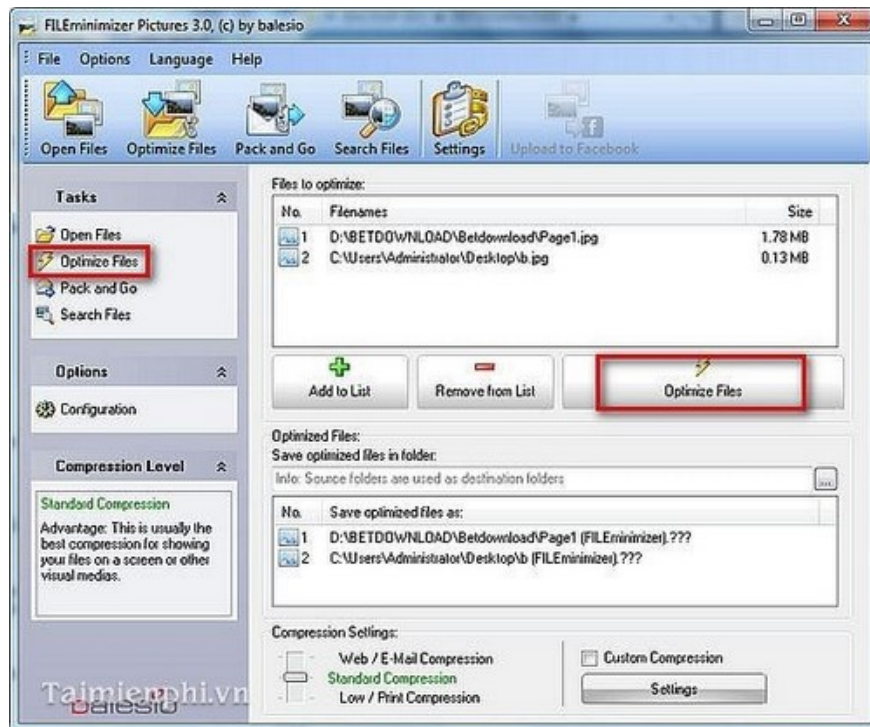

Step 3 : The **Open** window will appear. Select the path to the image file and click on the image you want to reduce the size of. Click **Open** to open the image.

- The selected image file will then be displayed on the program interface. You can also choose to add more images to reduce the size of multiple images at once by **clicking "Add to List"** . If you want to remove images from the list, select **"Remove from List"** .

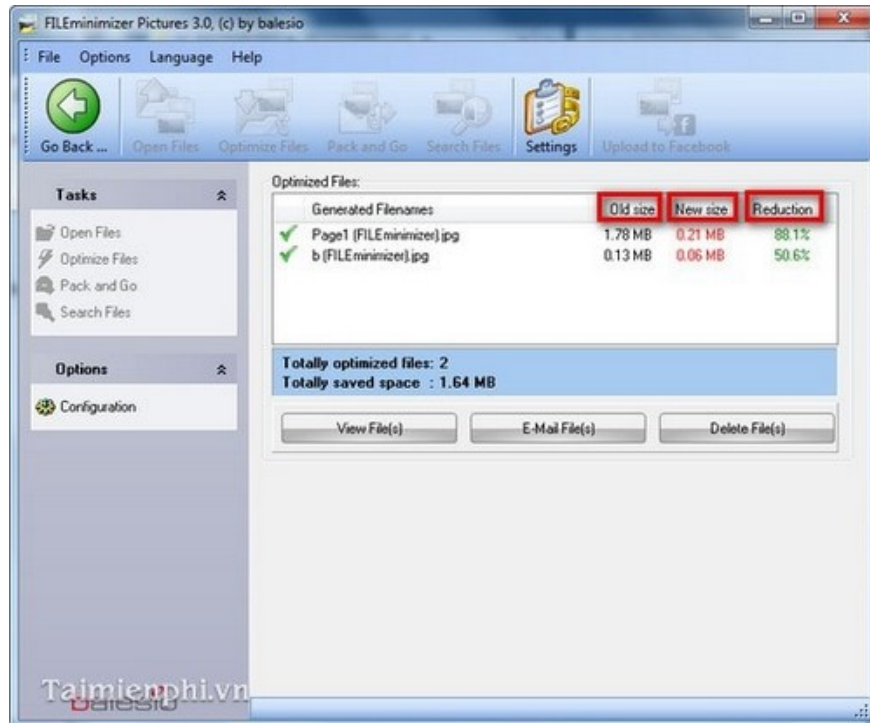

Step 4 : Click **Optimize Files** in the program (or in the **Tasks** section) to start the process of reducing the image file size.

Step 5 : The image file size reduction process is complete.

On the program interface you will see:

- **Old size:** The original size (file size) of the image.
- **New size:** The new size of the image after the size reduction.
- **Reduction:** The percentage of size reduced.
