

# Refresh Chrome's New Tab interface with a funny cat wallpaper

Google Chrome is one of the most used browsers today. However, if you keep using the default interface, sometimes it will be boring and the following suggestions will be an option for you to change the wallpaper on Chrome browser with extremely cute cats every time you Open 1 new tab.

Google Chrome is one of the most used browsers today. However, if you keep using the default interface, sometimes it will be boring and the following suggestions will be an option for you to change the wallpaper on Chrome browser with extremely cute cats every time you Open 1 new tab.

Catify is an effective tool to help make Google Chrome's newly opened tab page more interesting and beautiful as you surf the web.

## Step 1:

First, click on the following link to download Catify for Google Chrome browser.

1. Download Catify for Google Chrome

## Step 2:

Next, click on **Add to Chrome** .

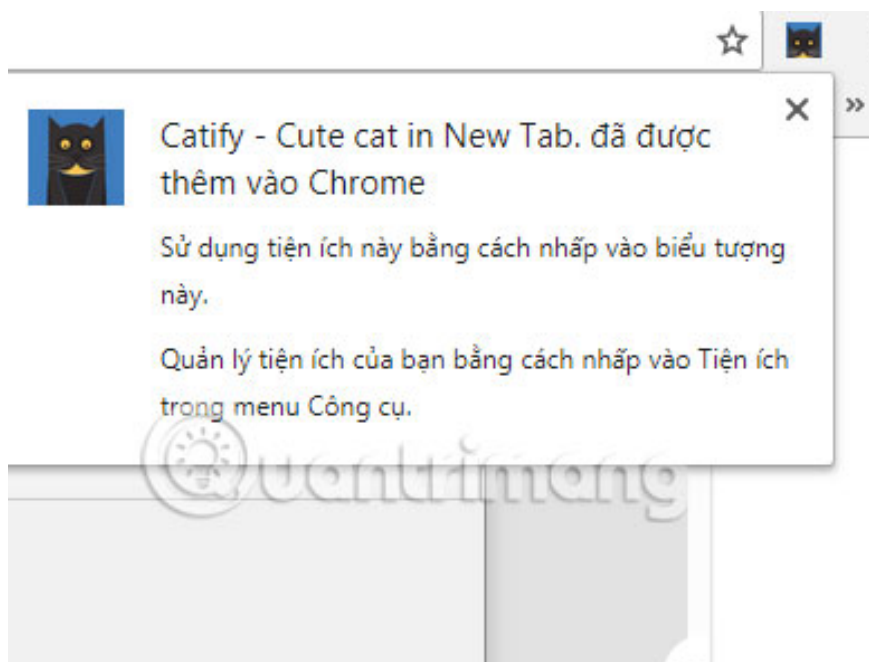

A new notice board appears, select **Add extension** to confirm that you want to install this add-on for your Chrome browser.

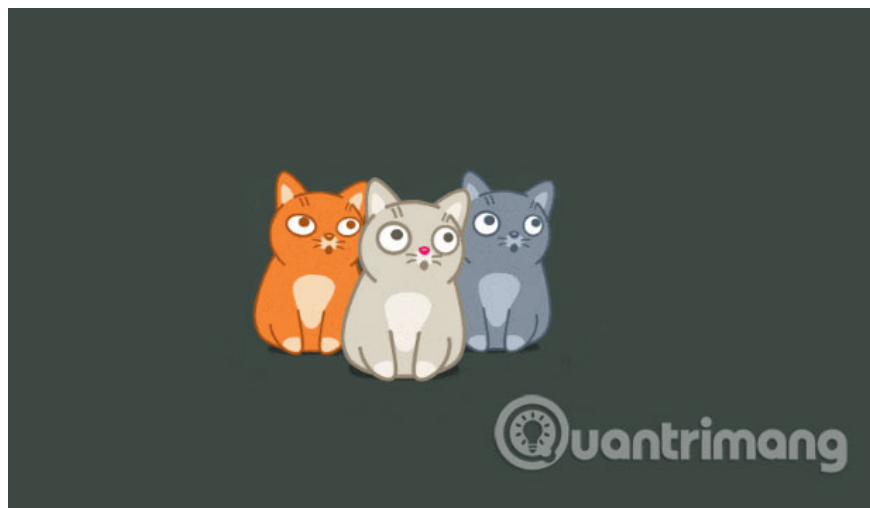

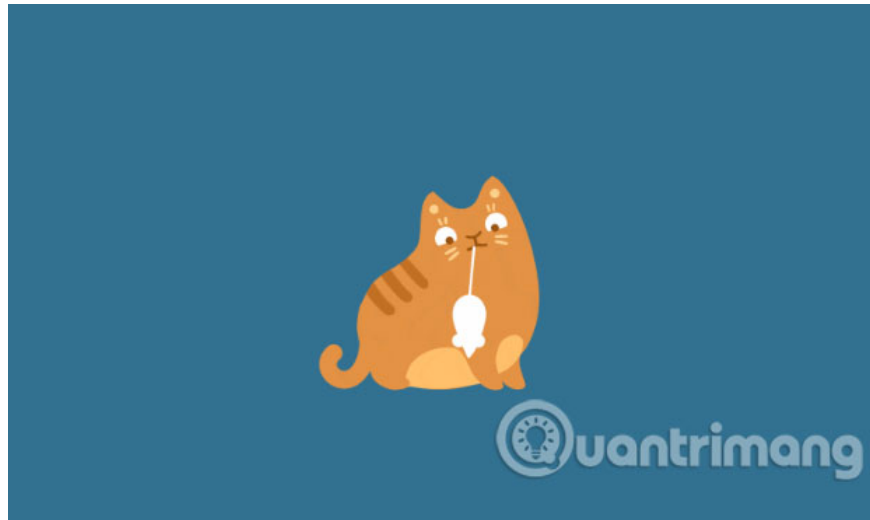

### Step 3:

You wait a bit for the wallpaper to be downloaded, automatically installed and presented immediately after the installation is complete. The device will display a successful installation message in the right corner of the screen to let you know.

### Step 4:

Now open a new tab on Chrome to check the results you have done. And these are super adorable cats that we have after a few simple steps.

Wish you have an enjoyable experience!
