Initially, you will only be able to fill your apartment with lazy unemployed tenants, but as you progress in the game, you will be able to unlock richer tenants. However, these tenants will have higher requirements, so be sure to pay attention to their requirements, because you do not want to lose guests.

Tap the smiley face icon on the right side of the screen to see your tenants' overall satisfaction and what they think of your property. Their complaints will give you clues as to what to do next. But there's no need to strive for 100% satisfaction. Just get above 50% and you'll be making rent.

The way to make a lot of money in this game is to have as many tenants as possible, so always open a new apartment as often as possible. Keep upgrading the furniture and interior of the apartment, and save up for the best tenant you can get, and over time, the money you spent on hiring that tenant will pay for itself.

The time you spend offline you can also earn money. The default maximum time when you first enter the game is 240 minutes of offline earning. And you can double this amount when you watch ads or spend 10 diamonds. But you should save your diamonds and watch ads.

After earning offline, you can look at the entire map to see if you can upgrade anything or open any new rooms. Or which areas you can upgrade and build more. Don't forget to recruit tenants for your new apartment. After spending money on upgrades, go offline again and time your earnings if you are an infrequent player.

As you progress through the game, you can open more service establishments. For example, the restaurant in the laundry, you can upgrade them immediately to serve more customers, have a larger capacity. But don't hire people to work in those areas. Hire them when needed instead of spending a lot of money on staff at the beginning.

That's it for anyone who wants to become a landlord. Simply follow the instructions from the beginning to have a growing hostel. Unlock new rooms, upgrade amenities, and upgrade your customer base.
