

Replace password for Hotmail account

To secure all information in Hotmail, changing your password regularly will help a lot. How to change the password is relatively simple with steps ...

The simplest and fastest way to protect all information in Gmail is to change the password regularly. And Hotmail is no exception. When you change your Hotmail password, it means changing your Microsoft account password, making it more secure for your Hotmail account. How to change Hotmail password is quite simple, similar to when we change the password for Gmail or Yahoo mail.

1. **How to retrieve Gmail password**
2. **10 features of Gmail that you should activate and try**
3. **Contacts in Gmail, Android phones are deleted, this is how to recover**

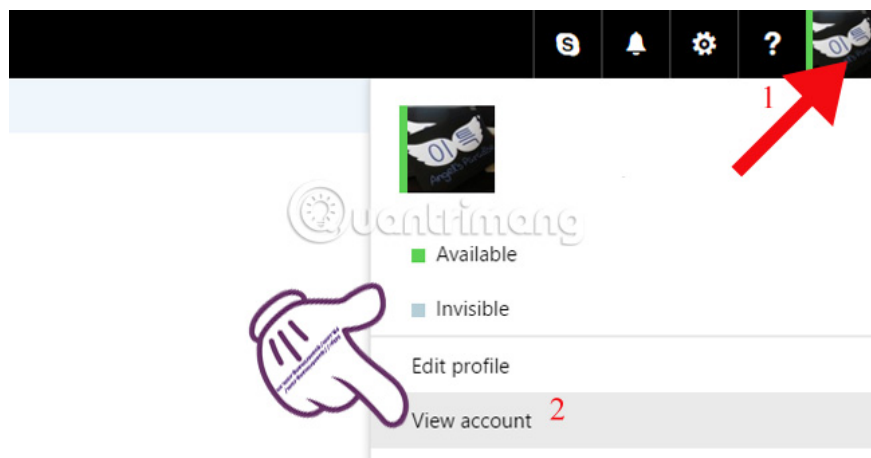

In the article below, Network Administrator will guide you step by step to change your Hotmail password to protect your account.

Step 1:

First of all, you need to log in to your personal Hotmail account.

Step 2:

At the interface of the Hotmail mailbox, click on **the avatar icon** above the screen. Then select **View account** .

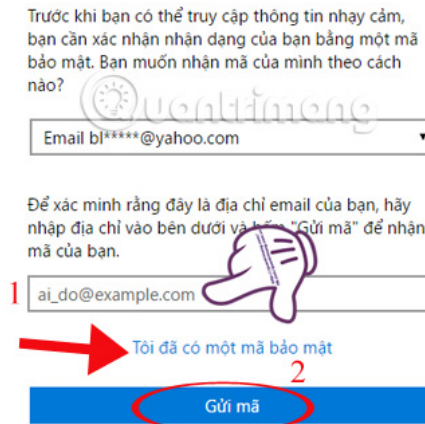

Step 3:

We will be transferred to the new tab. At the new interface, select Change password.

Step 4:

Microsoft will ask users to **enter their Hotmail account email address** to receive **the security code**. Enter the email address in the box below and click **Submit code**. Or if you already have a security code in advance, just click the **I have a security code** to enter the code.

Soon, Microsoft will send a confirmation code to the email account you just entered. We just need to get that code and enter it in the required box. Click **Submit** (Send).

Nhập mã

Nếu mã bạn nhập khớp với địa chỉ email trên tài khoản của bạn, chúng tôi sẽ gửi mã cho bạn.

Tôi đăng nhập thường xuyên trên thiết bị này. Đừng hỏi tôi về mã.

Sử dụng một tùy chọn khác

Gửi

Step 5:

The password change interface appears. Here you will see your Microsoft account name and items to fill.

1. Current password: Enter the password you are using.
2. New password (New password): enter a new password. Note, the new password is at least 8 characters long. You should place a password containing numbers and letters to increase security.
3. **Re-enter the password** (Reenter password): enter the new password correctly.

Below, you have the option to check the Change my password box every 72 days (Make me change my password every 72 days). When checking this box, the system will notify you to change the password after the 72 days have passed, counting from the date of the new password.

After you have filled in the information, click **Save** (Save) to proceed to set up a new password.
