

Replace 'shirt' for Google Chrome

If you're bored with the monotonous interface of the Chrome browser, use the color and interface change feature that Google provides in the latest version.

If you're bored with the monotonous interface of the Chrome browser, use the color and interface change feature that Google provides in the latest version .

Google Chrome has become an integral part of many people's 'online lives'. Chrome has the advantages of compact, simple but fast. But Chrome's somewhat monotonous interface makes many people feel bored. Therefore, in the latest version of **Chrome 3.0.196.2** , Google has added a feature to change the interface so that users can be more comfortable when experiencing digital life with Chrome.

To change the look of Chrome, simply select **Options** -> **Personal Stuff** -> **Themes** -> **Get Themes** (for the Vietnamese version, click on the ' **Customize** ' icon in the right corner, select ' **Options** '. 'then select the **Personal Stuff** tab in the next window that appears, click the **Get Themes** button at the end, and there will be hundreds of rich and diverse themes for you to choose from.

Or to make it easier, you just need to visit here with Chrome, then click the **Apply Theme** button for any theme you like.

The ability to change Chrome's interface is so interesting that, according to The New York Times, many designers volunteered to design themes for Google completely free of charge, in order to quickly help Google

improve the process. His smart browsing. If you want to design your own interface, Google is also willing to provide very detailed and detailed documentation on their home page in the near future. But they also stressed that this theme design is not easy for most of us.
