

Restore Toshiba Satellite laptop to factory

When a computer fails, the solution most people use is to delete everything and reinstall it from scratch.

TipsMake.com - When a computer fails, the solution most people use is to delete everything and reinstall it from the beginning. If a system frequently fails or you have used everything you still can't delete the virus, the best method for a laptop is to restore it to the state from the manufacturer.

The easiest way to restore the system is to use the recovery disk that came with the laptop, but you can also restore the system without using the disk, as *long as you haven't deleted and re-divided the entire drive. hard on the computer* . Every laptop with Windows pre-installed from the factory has an area with hard drive recovery utility, through this utility you can restore the system without the disk.

In this article, we'll show you a few easy steps to restore your laptop to its original state on your Toshiba Satellite computer

Step 1 : Go to your Windows account and copy all files or programs you want to use again after "redo" the whole system. You can use an external hard drive or USB to store these documents depending on the size of the documents.

Step 2 : Restart the system, wait until the Toshiba logo appears on the screen

Step 3 : Press the support key to open the hard drive utility menu. Depending on the type of Toshiba Satellite device you use, the shortcut may be **0** , **F1** or **F8**

Step 4 : Press **1** or click **Restore Original Factory Image** > Click **Yes** > Select **Next** to start the recovery process.

Step 5 : Restart the computer when the boot process ends. Follow the screen notification steps to select the date and time and language settings.
