Smart tablet devices along with smartphones are increasingly popular in life to meet the work and entertainment needs of users. After a period of use, you will encounter the case of the computer freezing, slow and need to find **a way to reset the Samsung tablet** or *how to turn off the Samsung tablet* . Besides fixing tablet errors, you can refer to the market, there are many different brands of tablets. Come to TipsMake and choose!

Reasons to Reset Samsung Tablet

Resetting a Samsung tablet is an operation that helps erase all data and settings added to the device during use. This helps erase the data in the device and restore it to the state it was when it was first purchased.

Resetting your Samsung tablet is necessary because after a period of use, your tablet may experience problems such as freezing or slowing down. The reason for the single, slow device is that the device is overloaded with data, even data containing black codes. Therefore, you need to reset the tablet to return the settings to their original state, delete unused junk data so that the device operates more smoothly.

In addition, the junk files in your tablet may be too much and it is difficult to delete them manually because it is very time-consuming and laborious.

How to reset Samsung tablet

How to turn off Samsung tablet and reset it via Settings

Step 1: Access the main interface of the Samsung tablet ? Click Settings ? Click General management .

Step 2: Click Backup and Reset.

Step 3: Tap Factory Data Reset.
