

## 'Revealing' the fastest notebook in the world

Recently, the UK's leading manufacturer of Zepto computers has launched the latest line of notebooks with a 'heavy' configuration.

**Recently, the UK's leading manufacturer of Zepto computers has launched the latest line of notebooks that have a "heavy" configuration compared to popular notebooks.**

Zepto's current fastest line of notebooks is called Nox A14, which uses a 14-inch screen with a screen resolution of up to 1440 x 900 pixels.

Zepto's fastest notebook Nox A14

The A14 Nox also has a 512MB GeForce 9600M GT display card, a 2.53 Ghz Core 2 Duo chip. Especially, this notebook line can support DDR2 RAM up to 8GB, 500GB or 128GB hard drive if users want to use hard drive that does not heat SSD.

In addition, the world's fastest notebook also has a Blu-ray format reader that replaces the standard DVD reader that is still popular today, Webcam 2.0, that supports Bluetooth 2.0, Wi-fi connectivity and possibly run on Windows Vista Business, Home Premium or Ultimate operating systems.

However, the 'super notebook' is currently only available on the European market, for \$ 1407.
