

Review Great Song Tu - Game first half '2 in 1' of Gamota new

Great Great Song Tu was officially released by Gamota on 24/4 with Alpha Test version and this period lasts until April 26.

Game "full screen"

Numerous players came to experience the moment the Great Tuoi Tu Tu **mobile game** came out at 10am. The screen of the phone is almost bursting because the crowded level of gamers spreads too quickly, too dangerous in just a few minutes.

It is funny and bustling, but this situation is also mildly inhibited because it is difficult for players to complete the task when the number of monsters is constantly overwhelmed by people, not coming out to fight is a worthwhile talk.

In the second half of April 2020, what is Vietnamese hot game village?

Vietnamese game village in April 2014 is much more bustling with so many super products being exploded from famous names such as VNG, Funtap, Gamota, VTC, .

The reason many players are interested in the Great Song Tu because this is probably one of the rare first half games in Vietnam with a breakthrough than other games of the same genre. The most notable feature is the diversity in the aisles of the denominations. 1 character in the game will not be as pure a mainstream as usual, but when you reach a certain level, you will receive an assistant and that assistant can choose one of the remaining factions in the game. Although 2 is 1 and 1 is 2, it is quite interesting that makes everyone curious.

Eye-catching interface, multi-line graphics

In the game, you can choose one of the three sects to transform, including: Thanh Ton, Kunlun and Van Mo. The character exudes the 'charisma' of the first genres with magical or magical images with sparkling wings on the body. This interface is quite simple but easy to understand, mainly explained to gamers clearly the strengths of the factions. If you like strong defensive tankers, choose Thanh Ton, prefer strong damage is Kunlun and finally Van Mo is for those who like to be mysterious assassins.

Great Dai Song Tu possesses 2.5D graphics with quite sharp graphics, from the ground, plants, costume design, . all shaping are very smooth, absolutely no annoying aliasing. However, locking the viewing angle makes some gamers feel uncomfortable. The relatively lightweight 1.5GB installer for most people can play is one of the advantages of this game.

It can be said that what Gamota towards the community is the optimization on the systems so that most people can play the game smoothly, especially the transitions, fast and no condition 'lag'. Accordingly, Great Dai Song Tu is built on an advanced system, each image file is designed by the minimalist team in capacity but does not

reduce the inherent quality.

Regarding the interface is quite familiar eyes, but I and many gamers are quite 'frustrated' in 1 detail, which is the button to move the character a bit too big, looks unsightly. If Great Great Song Tu could design it smaller and blur it would be more in harmony with the more general layout.

Fashion and fun in Great Song Tu must say is eye-catching, not only I but many gamers are fascinated because of this. There are gamers who spend all the time testing just to buy the fashion in order to delight because there are too many choices and styles.

Game for 'plowing people'

Like many other first half games, Great Song Song Tu level up extremely fast and there are nearly 500 levels, especially later it can reincarnate, even bleach, break the realm to higher levels, just like in the fantastic fantasy novels or movies we've seen.

The game still follows the role of plowing hoe to increase the normal battle force. Where players will be able to meet dozens of familiar features and activities of the MMORPG line from equipment, dance, cavalry, protection, style, god, beauty to the monk, mosaic, constitutes, notes, . all converge fully in the Great Song Tu.

In this world, gamers are adventurous in the endless journey to become the best in the place of Heaven and Earth. In parallel, the diversified chain of operations, rich Boss system allows players to easily level up, hunt for equipment, even rare equipment, etc. Play will continuously increase. This game is almost a place of 'favorable weather' for the plowing people.

At the same time, the game also opens a lot of contexts, the content of the theme of life and life is integrated logic into the main - secondary tasks to many PvE and PvP activities spread at different levels to You and your partner will explore and explore together.

To clarify more about the concept of parallelism, the feature that makes the Great Song Tu Song look more prominent than the other religious games is the ability to allow two parties to play at the same time. Specifically, in the stage of the first life, the player has the right to choose a character to practice and accompany him. More specifically, you can fully use all the skills of the chosen character clan.

Overall, Great Song Tu has had a successful Alpha Test phase and is expected by many people until the official launch date. Try exploring if you like the role-playing genre of fairy!
