1. Wireless connection: Bluetooth
2. Exclusive receiver (receiver): Yes
3. Ability to pair multiple devices: 3
4. Battery type: 2 AAA batteries

The Logitech K780 can be used wirelessly with a receiver or via Bluetooth

The Logitech K780 can be used wirelessly with a receiver or via Bluetooth. Although you can only use it with one device using the receiver, you can still connect the two devices via Bluetooth and easily switch between them. Besides, you can also choose to connect 3 devices via Bluetooth. The keyboard comes with 2 AAA batteries and the manufacturer rates the battery life at 24 months.

Experience typing

Typing with the original Logitech K780 keyboard might be a bit strange as it has round keys, but you'll get used to it pretty quickly. The keys are very stable. The spacing of the keys is also consistent and helps to reduce spelling errors. A relative force is required to press the key, so there is no need to worry about accidentally pressing a key.

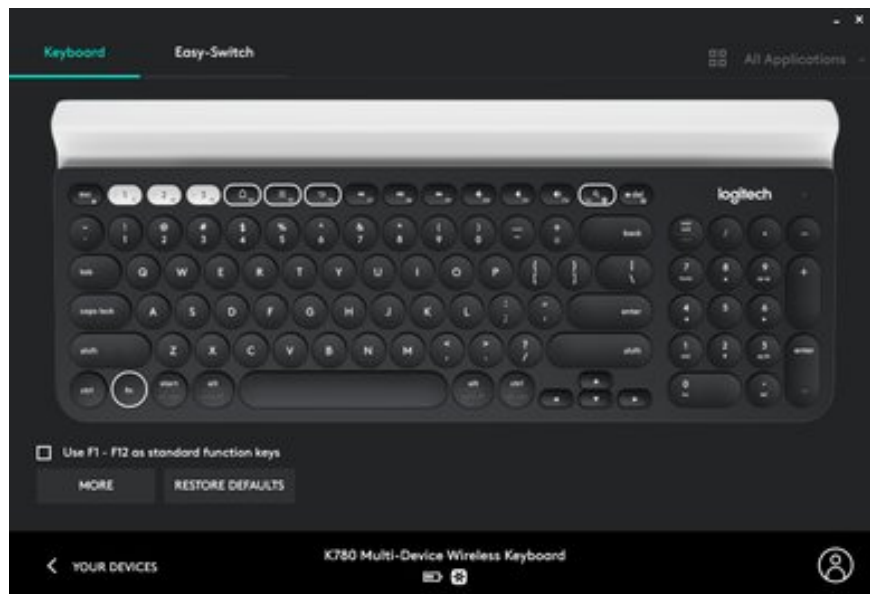

The Logitech K780 keyboard has rounded keys

Typing on this keyboard is very quiet and you are not afraid to disturb any colleagues around. Typing the space bar makes a slightly louder sound than the other keys, but it is still very quiet in general.
