Features of the portable speaker Shupo BT2017

Currently on the market of **portable speakers** there are many famous brands, but Shupo is still the name that captures the hearts of people, because Shupo is a high-end speaker towards sound quality as the main point, and solid Recently, manufacturers have introduced the Shupo BT2017 **karaoke speakers to** catch up with the trend and meet almost everyone's needs.

Shupo BT2017 speaker - the hottest current speaker

With a compact, eye-catching design with 2 wheels combined with hand pull, you can easily move the speaker to many places like a travel suitcase. The Shupo BT2017 portable towing speaker also attracts people by its new design, the front of the speaker is a solid bass with flexible lines creating a more luxurious beauty for Shupo speakers.

Shupo BT2017 Bluetooth speaker with wheels makes it easy to move

The impressive design in parallel with the sound quality made the Shupo BT2017 portable speaker add a plus point. 4-inch bass speaker system combined with a stable capacity of ~ 600W for lively sound, ear catch, solid bass combined with modern treble speaker is no different from a professional karaoke. All types of music from soft ballads to vibrant remix music when singing karaoke and Shupo BT2017 portable speakers all bring you moments of relaxation and lift your voice to new heights.

Speaker microphone system is much improved compared to previous speakers

Considered as a breakthrough design step on the Shupo line in 2017, portable speakers with more modern sound panel with full bass and treble adjustment system let you comfortably adjust the sound accordingly when sing karaoke. Besides the ability to connect bluetooth, USB adds versatility to the Shupo line.

Shupo BT2017 speakers with sound control buttons on the back

The duration of using the loudspeaker is quite long, from 6 to 8 hours at 70% of the capacity, if the battery is depleted, it can be switched to direct electricity mode, in this mode, the electricity will not go completely to the limit. The case of bottles and damaged containers helps extend the life of the speaker.
