

Review SHARP AQUOS 4T-C60DL1X TV: Large size - Attractive price

If you are looking for a TV with a 60-inch screen, 4K resolution for about \$1000, this is a product you should not miss.

In the context that the pandemic is still complicated, and the distance orders can still be applied at any time, in addition to the need to use devices such as smartphones and computers, perhaps television is still an option. Indispensable for family fun and entertainment activities.

TVs not only have a large screen, better visibility than smartphones, but also can connect family members together. And if you are looking for a TV product with a large screen size, high resolution in the price segment of about \$1000, the SHARP AQUOS 4T-C60DL1X is probably the choice worth your consideration.

TV 4T-C60DL1X is the latest high-end AQUOS Android TV model from SHARP - Japan's leading TV brand for more than 16 years. In particular, AQUOS is a combination of the words Aqua (water) and Quality (quality) and has been used since 2001 as a symbol of "The New Standard for 21st Century Home TV".

SHARP AQUOS 4T-C60DL1X makes a strong impression on users with its 60' screen size and high-end Japanese-made panels - something rare in this price segment has. With such a large screen size, it is very suitable for large room spaces or large families.

Seen from the front, SHARP AQUOS 4T-C60DL1X offers a simple and highly practical design. The screen border is designed quite thin, giving users a more impressive movie and entertainment experience. In addition, the base is finished with extremely sturdy V-shaped metal.

With a screen size of up to 60 inches, not only allows users to freely watch movies and entertain, but also can use the product as a peripheral device to connect to a laptop, present, study online and online meeting.

With the space below the TV, users can add a soundbar to increase the aesthetics as well as improve the sound quality. SHARP AQUOS 4T-C60DL1X is fully equipped with the most popular connection ports currently including 4 HDMI ports, 2 USB ports, 1 set of AV-IN ports, Headphone port, Digital Audio Output and LAN port for Internet connection.

SHARP AQUOS 4T-C60DL1X is equipped with Direct LED display technology. This contributes to an increase in display quality, avoids light leakage at the edge of the screen, and the colors on the screen are also more uniform.

In terms of visibility, SHARP AQUOS 4T-C60DL1X is not inferior to any competitor when equipped with a screen with 4K resolution, exclusive Deep Chroma Display color technology that helps achieve 100% of the color gamut compared to other competitors. digital cinema color standard, HDR10 display technology to enhance movie viewing and entertainment experiences, X4 Revelation Processor, enhancing product experience

without any special signal.

During actual experience, SHARP AQUOS 4T-C60DL1X offers good visibility, vibrant colors, details as well as high contrast. Users can easily monitor the displayed content from different viewing angles.

Besides, the new product from SHARP is also equipped with Dolby Audio sound technology with two speakers placed below. Users can add a Soundbar speaker system to help bring the perfect sound experience.

In terms of software, SHARP AQUOS 4T-C60DL1X runs on Android TV operating system to help bring a diverse application store. In addition to the built-in manufacturer applications such as YouTube, Netflix or Prime Video, users can completely download more entertainment applications such as Vieon or FPT Play.

The highlight for products running Android TV is the support for voice control using the Google Assistant virtual assistant. With SHARP AQUOS 4T-C60DL1X, users can completely use this function to command the device to play music, watch movies without complicated press operations on the remote. To use this feature, users just need to press the virtual assistant button on the remote, and then use their voice to control. Extremely simple.

The remote also has built-in shortcuts for quick access to applications like YouTube or Netflix. With a curved design, the feeling of holding the remote also becomes more huggable and comfortable.

In short, if you are looking for a TV model with a large size of 60 inches with 4K resolution, high practicality and support for voice control features, a huge entertainment application store. Supporting advanced processing technologies such as Deep Chroma Display, HDR, SHARP AQUOS 4T-C60DL1X is the choice that you should not ignore.
