Facial washer is a specialized device in the field of beauty, facial care. With a fully automatic operating mechanism, the washing machine is an effective solution to replace manual manual facial treatments. And to help you choose the most suitable models, the review article below, will summarize **the best face washes** on the market today.

Benefits when using a washing machine?

1. **Cleansing dirt for your face:** Using your hands or a washcloth to wash your face in the traditional way will only help you remove the dirt on the surface of the skin, not deep inside the skin. As for the washing machine, it is different, thanks to the rotating mechanism or sound waves with high frequency of vibration will help the layers of dirt, sebum deep inside the pores be removed, thereby preventing the cause of formation. Acne
2. **Exfoliating:** Some facial cleaners will be supported with an exfoliating function, giving women a bright and smooth skin.
3. **Circulation, blood circulation and prevent aging:** Thanks to rotating action, vibration and relaxing massage modes will help improve circulation, blood circulation after stressful working days.

Experience of choosing the best washing machine

1. **Choose your style, design:** You should choose the washing machine has a handheld design, extremely compact for convenience to use or take anywhere.
2. **Choose battery-powered or electric-powered models:** There are actually two types of face washers, battery-powered and electric-powered. However, battery-powered devices are still more commonly used. The reason is because it is often neatly organized, not entangled.
3. **Rotating / vibrating power:** Washing machines, whether they are rotary technology or ultrasonic vibrators, also need reasonable power. With the machine with large frequency vibration from 7,000 to 8,000 rpm will bring performance to clean deeper dirt and more efficiently.
4. **The use mode:** A washing machine with multiple modes will support the user very well during use. Some high-end models are also equipped with more than 20 different modes to meet the diverse needs of users.
5. **Choose the device that suits your skin:** For normal skin types, you can choose the model you want. For dry, thin, vulnerable skin, avoid a machine with a scrub brush instead of silicon brushes to create a soft, smooth skin.

What is the best face washer on the market today?

1. Rio washing machine

Rio is one of the brands from the UK with over 30 years of experience manufacturing beauty equipment, remedies, beauty tools and accessories. Rio has pioneered the beauty utility category that combines beauty technology and aesthetics.

Rio face washers always have a compact, handy design that can be carried anywhere. Rio always applies the most advanced technology in each product to bring you a completely satisfying experience.

2. Beurer face wash

Beurer face washer is one of the famous brands from Germany. Thanks to the advanced technology tiens, leading that Beurer products are always appreciated for both quality and durability.

Advantages of Beurer washing machine:

1. The machine is capable of deep cleaning, cleaning many times higher than manual cleaning, even higher than many other models on the market.
2. It helps to remove sebum, dirt, prevent bacteria and acne from affecting the skin while exfoliating gently, helping the skin surface to be clear.
3. The rotating tip technology moves up and down smoothly, spiraling to make the brush contact the skin better, contributing to effective cleaning.
4. The modern vibrating technology every second of brush head will glide over the skin about 300 times to help blood circulation so the skin will be more youthful and healthier.
5. The machine has a simple structure, easy to use
6. Water-resistant design for durability

Defect:

1. Machines are manufactured in many different countries around the world so sometimes it will be difficult for users to choose.

3. Lifetrons washing machine

Lifetrons is a famous Swiss brand specializing in manufacturing beauty equipment. In Vietnam, Lifetrons are impressed with the range of massage machines, scrubs, facials, face washers and face lift machines. Most Lifetrons devices are built on modern technology platforms such as RF, Ionic, ultrasonic, light therapy, electrophoresis technology, etc.

Advantages:

1. The device possesses a compact design, special crystal made from high-quality materials, so it is durable.
2. Applying many advanced and modern technologies going into the skin care for users with great experiences.

3. In addition, Lifetrons washing machines are equipped with a negative ion technology toothbrush to help clean and make moon effectively.

4. Foreo face washer

This is a brand of facial cleaners from Sweden, specializing in the manufacture and distribution of equipment in the field of beauty and health care.

Most of the Foreo face washers are high-class, with beautiful designs, many youthful and dynamic colors and especially compact, handy.

The device works with modern T-sonic ultrasound technology with high frequency of vibration and the brush is designed from many soft and smooth silicon fibers so it can be used for all skin types including women. have sensitive skin.

However, this is a high-end product line so their price is quite high, in addition to the risk of being counterfeited, making it difficult for buyers.

5. Lumispa face washer

As a new product appearing on the Vietnamese market, Lumispa face washer has quickly won the trust and love of customers.

Design is quite eye-catching, small with convenient handle for users to manipulate. The device uses dual technology for more perfect skin care. In particular, the device is waterproof, does not have an entangled charging cord structure for a completely different user experience.

However, a rather inconvenient point of this series is that you have to use the company's cleanser, not replace it with any other type of milk.

6. Hada Crie washing machine

Hada Crie is a trademark of Hitachi brand of Japan, specializing in manufacturing and distributing to the line of high-quality washing machine products.

Its models are always on the list of best-selling products on amazon and ebay. All products are equipped with the latest ion technology which is able to clean the dirt deep inside the pores and moisturize the skin to stay fresh.

The biggest weakness of this product line is that the price is quite high and often does not include water resistance.

Above are the share about the best washing machine lines on the market today. Each product line has its own advantages and disadvantages. Consider your actual use needs, economic conditions to make the most appropriate choice!
