

# Review the best technology products performed at IFA 2018

IFA 2018, the largest consumer technology event in Europe is taking place from August 31 - September 5, 2018 with the participation of many new and modern technologies from smartphones to gaming computers that many people do not from pleasure.

IFA 2018, the largest consumer technology event in Europe is taking place from August 31 - September 5, 2018 with the participation of many new and modern technologies from smartphones to gaming computers that many people do not from pleasure.

Here are the 5 best technologies to show at IFA 2018.

## 8K TV

Samsung and LG, the two leading TV industry companies, have all announced their own 8K TVs with four times the resolution of current 4K screens.

Samsung's product is Q900 with 85 inch size and will be released in November. This will be the first 8K TV to hit the market.

## QLED 8K

LG has also unveiled its own 88-inch 8K OLED TV, now the largest OLED screen TV in the world and the largest resolution in the world. However, the price and time of products officially launched on the market has not been announced yet.

## **Acer Swift 5: The lightest 15-inch laptop in the world**

The Acer Swift 5 has a 15.6-inch screen but weighs less than 1kg thanks to its magnesium-lithium and aluminum-magnesium alloy. Therefore, the Acer Swift 5 is the thinnest and lightest laptop in the world today in the 15-inch segment.

In addition, the Acer Swift 5 also has a huge hardware configuration, providing superior processing power.

Up to 2 versions of Swift 5 are announced by Acer: Core i7-8565U or Core i5-8265U. Both versions include 2 GB Nvidia GTX 1050 Max-Q graphics, DDR4 RAM up to 16GB and 1TB SSD memory. Battery life is up to 8 hours after each charge.

## **Blackberry Key2 LE**

One of the most noted smartphones at IFA 2018 is Blackberry Key2 LE. This is considered a cheap version of BlackBerry Key2, a high-end smartphone released in June last.

The Key2 LE is equipped with a 4.5-inch touch screen and a Blackberry physical QWERTY keyboard. Key2 LE configuration includes Qualcomm Snapdragon 636 processor, 4GB RAM and 3000mAh battery.

The Blackberry will launch Key2 LE on the market next month and for \$ 399 for 32GB memory or 449USD for 64GB memory. This device will be a formidable competitor in the mid-range segment in the coming time.

### **Polaroid OneStep +**

Polaroid OneStep + is a retro snapshot camera. This new effort by Polaroid, a brand associated with photography in the 1970s and 1980s to return to the market.

Polaroid OneStep + comes with a dual lens system that specializes in portrait photography, allowing shooting distances of nearly 30 cm.

In addition, Polaroid OneStep + also allows users to instantly share photos with a smartphone via Bluetooth support to be able to edit and share online.

### **Acer Predator Thronos**

Predator Thronos, the unique gaming chair that supports three screens, can vibrate rotation
