

Review the latest SoundMax AH-314 headset

Earpiece headphones with streamer, gamer, online MC football ... is an indispensable companion. This article will review for you about the latest SoundMax AH-314 headset.

Earpiece headphones are widely used by many gamers, streamer. In which Soundmax series is appreciated by silky softness in both material and sound output.

Today, Network Administrator will review the latest SoundMax AH-314 headset to help you make the right choice.

External appearance

First I will talk about the exterior design of this latest super product. The first thing impresses by eye-catching colors when mixed between black and orange brings a new feeling.

Next, when you look at the earcups, there will definitely be a "right" feeling. By SoundMax headphones AH-314 using leather material wrapped outside soft, does not cause discomfort.

The inside of the top arch is also lined with a thick foam pad that covers leatherette material that looks elegant and also very smooth to use.

Continuing to look down at the accessories, the first thing to see will be the volume control button and the on / off microphone that has been "detached" from the ear tuber, returning to the old position on the signal cable.

This will help gamers, streamer, and online sports feel softer when wearing headphones.

The next will be wearing try and feel. As a representative of the headphone line for entertainment with the game, SoundMax AH-314 possesses a relatively bulky appearance compared to normal headphones.

However, you can still adjust the size of the ear ring to match each person's head size. Thanks to using most plastic materials, SoundMax AH-314 is also not heavy weight, causing discomfort when worn continuously.

With the highlight is the LED cluster on the outside of the bright red ear tubers, plus the red border separating the ear pads and the negative chamber, SoundMax AH-314 can easily catch the eye of the players looking for a product. Products are likely to cause high attention.

The signal cable section also scored before users because of its high level and meticulousness. The outer shielded signal cable has high softness and it is important that this protection does not increase the diameter of the cable, creating an imbalance between 2 ears when used.

About feeling when experiencing

Ear design so you can rest assured that the sound will not be played out. SoundMax AH-314 headset is the latest product of 2019, especially not only for the PC version but also you can play battle game right on your smartphone. Suitable for gamers, Streamer, people with specific characteristics who want to record live.

Keep talking about LED lights, you want to activate the light just connect the USB cable from the headset to the USB terminal available on the computer, smartphone can help SoundMax AH-314 headphones create special press.

With the remaining 2 2.5mm lanes, users only need to 'fill in' the audio output port and microphone input on the computer that can be impartially exchanged with teammates in the game.

SoundMax AH-314 headphones, this product also shows the change when sold together with the transducer to combine both audio and voice signal lines into one, suitable for battle demand on smartphones or when need to connect to the new generation laptop models which only have 3.5mm lane.

The size of 40mm diameter speaker meets the frequency range from 20Hz to 20KHz, the omnidirectional recording microphone helps "record" almost details of the voice of the gamer. 2.2 meter wire length helps gamers to comfortably operate without restraint.

Above are a few reviews of the SoundMax AH-314 earphones line for gamers, streamer, online football mc .

With the lively experience of the latest rookie 2019 will satisfy you. In particular, with the modern improvements that SoundMax earphones bring, but still sold at extremely affordable prices of VND 289,000.
