'Smash' the box and set

The whole product includes 3 pieces: Stand, body of stand and screen. The best part about this setup is that no tools are required! This screen setup can be done within a minute!

The monitor also comes with power cable, HDMI cable, Display Port cable and upstream USB 3.0 cable.

How to power on the LG 34GK950F UltraWide gaming screen and navigate through the menu is actually quite interesting. LG has designed a control button below the screen. With that single controller, you can turn the screen on and off (by pressing), select the input source, adjust settings, and choose different game presets. Everything is intuitive and most entertaining gamers will be able to use it immediately without having to read the user manual.

The setup is very simple

Evaluation during use

To help decide if this monitor is right for you, I tested this gaming monitor by using it as a daily monitor and focused on the real-world experience, instead of fumbling with response time. Use in a daily setting will yield the clearest possible results.

Entertainment

Watching movies is definitely a very enjoyable experience on the LG 34GK950F UltraWide gaming screen. Vibrant colors, sharp images and curved Ultrawide screens keep you truly immersed. With a 21: 9 aspect ratio, most movies will fill the entire screen from top to bottom.

Vibrant colors, sharp images

Gaming

Technically, gaming performance is highly dependent on gaming devices and graphics cards. There are very few ways a gaming monitor can contribute to performance. However, the LG 34GK950F display is fully loaded with reliable features that will enhance your gaming experience, such as AMD Radeon FreeSync 2 HDR, maximum refresh rate of 144Hz and reduced motion blur mode. dynamic.

Some of the other features include **Dynamic Action Sync** mode that lets you see actions that occur in real time, **Black Stabilizer Mode** brightens dark areas for better visibility in dark scenes and **Crosshair** feature enhances intensity. Exactly in first-person shooters.

Edit video

This is definitely an area where this curved screen shines. I regularly edit videos in Final Cut Pro X, and find that using this monitor has revolutionized the editing process, speeded up the workflow, and improved efficiency.

You can display the timeline, transitions and effects on your laptop, have all the different viewing angles of the cam-shot clips on one half of the 34-inch LG UltraWide screen and the preview screen on the half screen. The other image, there is still room for the Inspector tool and the color wheel.

This screen definitely makes a big difference, when you don't need to squint to see what's being edited, or constantly have to change between different views just to make some quick adjustments. .

Video editing is one area where this curved screen shines

Daily use

Even if you're just looking for a monitor to use for basic tasks, this LG 34GK950F UltraWide monitor makes it much more enjoyable and comfortable.

The adjustable range that the stand provides, along with the viewing angle of the screen, makes it easy to get the perfect height and viewing angle. That is not to mention the screen area that it provides. You can open 6 application windows simultaneously. This makes multitasking a little easier.

Conclude

Regardless of the fact that the 34-inch LG UltraGear Curved QHD Nano IPS is marketed as a gaming monitor, it is still a great monitor for everyday use, thanks to its high quality, high-performance capabilities, correction and ergonomics.

The price of this monitor is \$ 899.99 (about 21 million VND) and this is the only drawback of the product. At such a high price, this 34-inch LG IPS UltraGear Curved QHD Nano IPS screen is a product that is not easy to own for most people.

If you have enough budget, this will be a highly recommended monitor, especially when paired with a high-end gaming rig.
