

Review the Soundmax M2 bluetooth speaker

Today, to serve the needs of teaching, presentations and sales ... a bluetooth speaker like Soundmax M2 will be a great solution. This speaker has a sleek design, excellent sound quality, and comes with a built-in wireless microphone that enhances the ability to avoid band interference that will provide a good experience.

Today, to serve the needs of teaching, presentation and sales . besides teaching aids, a portable bluetooth speaker like Soundmax M2 will be a great solution. This speaker has a sleek design, excellent sound quality, and comes with a wireless microphone that enhances the ability to switch bands to avoid interference. Compared to the previous version Soundmax M1, M2 is also compact and convenient.

External design

SoundMax M-2 has a compact design like a suitcase with a blue outer shell, a sturdy black metal mesh. On the side of the speaker, utility controls and easy-to-operate modes.

Basically, the size of M2 speakers is quite suitable for use not only in lecture halls but also for use in picnics or teambuilding.

Not only owning a compact size, the weight of this M2 speaker is also only 2.6kg by using plastic materials as a frame, easy to carry when moving during use.

Technical specifications of M2 speakers

Another plus of the M2 speaker is the wireless microphone, which uses 2 AA batteries. Compared to the old M1 version, the microphone with M2 speaker has more hardware, LCD screen indicates battery capacity, has flexible frequency conversion ability to avoid noise when there are many microphones of M2 speakers used at the same time there. The M2 is also equipped with a 6.3mm wired microphone input with the echo control (echo) and volume of the microphone as usual at the back.

The SoundMax M-2 in addition to the ability to play music from the 3.5 mm input integrated on the front also meets the need for wireless entertainment with music sources such as smartphones, tablets or audio sources that support Bluetooth. For additional music options, this model also includes a memory card slot, USB like other Soundmax speakers.

SoundMax M-2 is enhanced with treble speakers to separate the high sound range and also promises to improve the bass note quality for this compact portable speaker set. Actual exposure shows that SoundMax M-2 scores at loudness. SoundMax M-2 with a capacity of 40W should generally be 'superfluous' for regular classrooms and of course be sufficiently noticeable when used in open spaces.

Sound quality of SoundMax M-2 has generally been more or less improved compared to the M-1 predecessor. Although still focusing heavily on mid-range, SoundMax M-2 is still 'quality' thanks to its 'sweetness' and no break when playing at full capacity, very suitable for teaching needs or field trips. outdoor.

With this M2 speaker, you only need to charge within 5 hours to be comfortable to use up to 6 hours of extreme utility. Speakers also have a wireless connection range of up to 10m.

In conclusion, the M2 speaker is one of the best rated bluetooth speakers now that it inherits the advantages of the M1 before and has added a more professional microphone design.
