

# 'rival' Galaxy S23 Ultra launched, easy to cause a fever because it is cheaper than both iPhone 14 and Xiaomi 13

The rival of the Galaxy S23 Ultra has just been officially announced with a price that makes even the flagship not the highest priced.

During the press conference this afternoon, OPPO officially launched the Reno 10 series of phones. In which, OPPO Reno10 Pro + is considered the center of the stage when it is powerfully equipped on par with the Galaxy S23 Ultra but with a price tag of only from 3899 yuan equivalent to about 12.9 million. In particular, the periscope camera is considered the most outstanding feature on OPPO Reno10 Pro +.

OPPO said that Reno10 Pro + is the smartphone with the thinnest and lightest design on the market with a periscope lens. Currently, the weight of most periscope telephoto mobile phones usually exceeds 200g, while the OPPO Reno10 Pro+ mobile phone is only 8.28mm thick and weighs only 194g.

OPPO says that the Reno10 series offers more portrait photography capabilities, users no longer have to rely on the main wide-angle camera to take portraits, but can also use this useful ultra-bright and dark telephoto lens to capture portraits. Take half-length portraits and close-ups of expressions.

It can capture beautiful portrait works at 1x, 3x and 6x golden focal lengths, which really helps users realize the freedom of portrait composition.

Not only that, OPPO Reno10 Pro+ inherits the ultra-light and dark portrait photography of the Find X6 series and the powerful periscope telephoto capabilities, allowing every user to capture the beauty of life with light and

dark.

In terms of configuration, OPPO Reno10 Pro + is equipped with the flagship Qualcomm Snapdragon 8+ Gen1 platform with 16GB RAM and two 256GB or 512GB memory options, providing the ability to smoothly handle all applications on today's smartphones. In terms of screen, the rival of the Galaxy S23 Ultra has a ProXDR screen that supports 120Hz refresh rate along with 1.07 billion colors and a maximum brightness of 1400 nits.

In addition, Reno10 Pro + is also equipped with a SUPERVOOC S power management chip that saves 45% of the area of ???the fast charging device on the motherboard, the large 4700 mAh battery under the thin and light body is a pretty big effort of the company. OPPO.

OPPO Reno 10 Pro + has the following specific versions:

1. OPPO Reno 10 Pro + 16/256GB version - priced from 3899 yuan about 12.9 million
2. OPPO Reno 10 Pro + 16/512GB version - price from 4299 yuan about 14.3 million

Both are as cheap as mid-range smartphones and even much lower than the iPhone 14 or Xiaomi 13.
