

Rounding my eyes at the phone with a 1-0-2, it looks just like a temperature but full of 'martial arts', can change the voice

This Zanco S-Pen is not just a phone, but many other unique features that no smartphone has. Such as turning into a recorder, laser pen or stylus for all devices.

Zanco is the unique phone with a unique, compact and powerful design that goes against the big screen trend of smartphones today. This Zanco S-Pen is not just a phone, but many other unique features that no smartphone has. Such as turning into a recorder, laser pen or stylus for all devices.

Zanco only serves essential needs such as calling, texting, listening to music, watching videos . not having a good touch screen or having as many functions as we often see on other modern smartphones. But Zanco has many effects to make everyone surprised.

Zanco features.

The first is the Bluetooth self-connect feature with any compatible device including iPhone and turns into an arbitrary service stylus.

Just put Zanco next to the device to receive the signal immediately.

With a small design, users can easily bring Zanco with people everyday.
