  1. 130-inch Digistorm curved projection screen
  2. 3D Tab Tension 92 inch screen
  3. 100-inch EA - 100EW silver projection screen

## Advantages of curved screens, 3D projection screens

Watching movies is an indispensable entertainment activity of people in modern society. Instead of having to watch movies on small-screen TVs or crowded with expensive cinemas, many families have invested in home cinema screens with curved screens, 3D movie screens. Compared to conventional projection **screens**, **3D projection screens** have a higher price. However, 'expensive', the quality of this kind of screen makes people really want to own it.

On the market, the most popular 3D movie screen is silver screen (Silver screen). This device is designed to fit with a short-lived 2-camera projector. The silver screen will be sprayed with a high quality silver coating on the surface with an antioxidant layer. Thanks to that, it can reflect images with the best brightness, providing realistic, deep 3D footage. Not only that, the device also helps increase the contrast of the projector to the fullest extent; covered with black border to limit light dispersion.

Curved screen, 3D screen brings true, deep image

## Some samples of curved screens, the best 3D projection screens for family cinema rooms

Curved projection screen, 3D projection screen with various designs and designs. Here are some products that you can refer to:

### 1. 130-inch Digistorm curved projection screen

DigiStorm 130 inch fixed projection screen is the perfect choice for families who want to install a cinema room at home. The device is the same as a bridge mirror. Thanks to that, it can focus reflections on the viewer instead of sneezing to the wall of the projection room, allowing viewers to see the image better. Not only that, the Digistorm curved screen also has the ability to significantly extend the viewer's viewing space compared to the flat screen. The ratio of curved screen is similar to that of cinema screen (2.35: 1 or 2.40: 1), so the experience that it brings is not inferior to the theater. **Price: 14,600,000 VND.**

#### Technical specifications

1. Material: Velvet-covered aluminum frame
2. Screen size: 130 inches
3. Size: 177 x 303 cm (including frame), 162 x 288 (excluding frames)
