

Samsung confirmed to introduce S9 on February 25, this is all we know about S9 at this time

This is all we know about S9 so far.

After identifying the date Samsung officially introduced S9, there was a source saying S9 will be sold from mid-March.

Perhaps we know the launch schedule of Samsung Galaxy S9, the high-end segment smartphone is highly anticipated. Evan Blass, who specializes in providing well-known technology information, said that from a C-level operator at a phone case maker he knows, Galaxy S9 and Galaxy S9 Plus will start accepting orders. from 1/3 and officially on the shelves from March 16.

Samsung has also confirmed it will announce the new phone on February 25, at Mobile World Congress conference in Barcelona, ??Spain. Before the details of S9 are published, this is what we know.

Official announcement time: February 25

The time frame that Blass offers is quite similar to Samsung's previous schedule and since they also officially confirmed the date of the S9 announcement, the schedule should be quite reliable.

Samsung confirmed will reveal Galaxy S9 next month

Although last year, the Galaxy S8 was delayed until April due to safety issues. But Galaxy S7 was previously announced at the end of February, released in mid-March, previous products in the same line as the same time frame.

Samsung sent invitations for press conferences for the February 25 event

Details about the S9 have not been announced but Samsung sent an invitation to attend the press conference for the upcoming event opening. The invitation also confirmed the name of the new phone because we still guessed it would be S9 but the 9th image on the invitation confirmed this.

Also on the invitation, the words '**Camera**' and '**Reimagined**' show that the new product will focus more on camera changes.

The press conference invitation came to many technology newspapers like The Verge, Business Insider .

Many rumors and images leaked to Galaxy S9

Not surprisingly, there are many images and information leaked to Samsung's new phones. Recently there is also a video on S9 hand (of course the model predicted) with touch screen and design quite like S8.

Some information also came from Samsung itself when they posted on the new camera technology website, which brought updates including the ability to autofocus, adjust more parameters without having to switch to professional mode. Many people claim this information about S9.

Images leaked to Galaxy S9 and Galaxy S9 Plus

News about new features is still a secret

Up to now, most still think that Galaxy S9 is almost an update, not a breakthrough. Samsung says users can expect the Bixby assistant to be updated, especially the interface is easier to navigate. Some sources say Samsung will modify the design a bit to make it easier to use.

Leaked images Galaxy S9, Galaxy S9 +, fingerprint sensor under the camera

S9 may have fingerprint sensor in the middle of the back for easier touch. Many people say the sensor on the right side of S8 is slightly opposite.

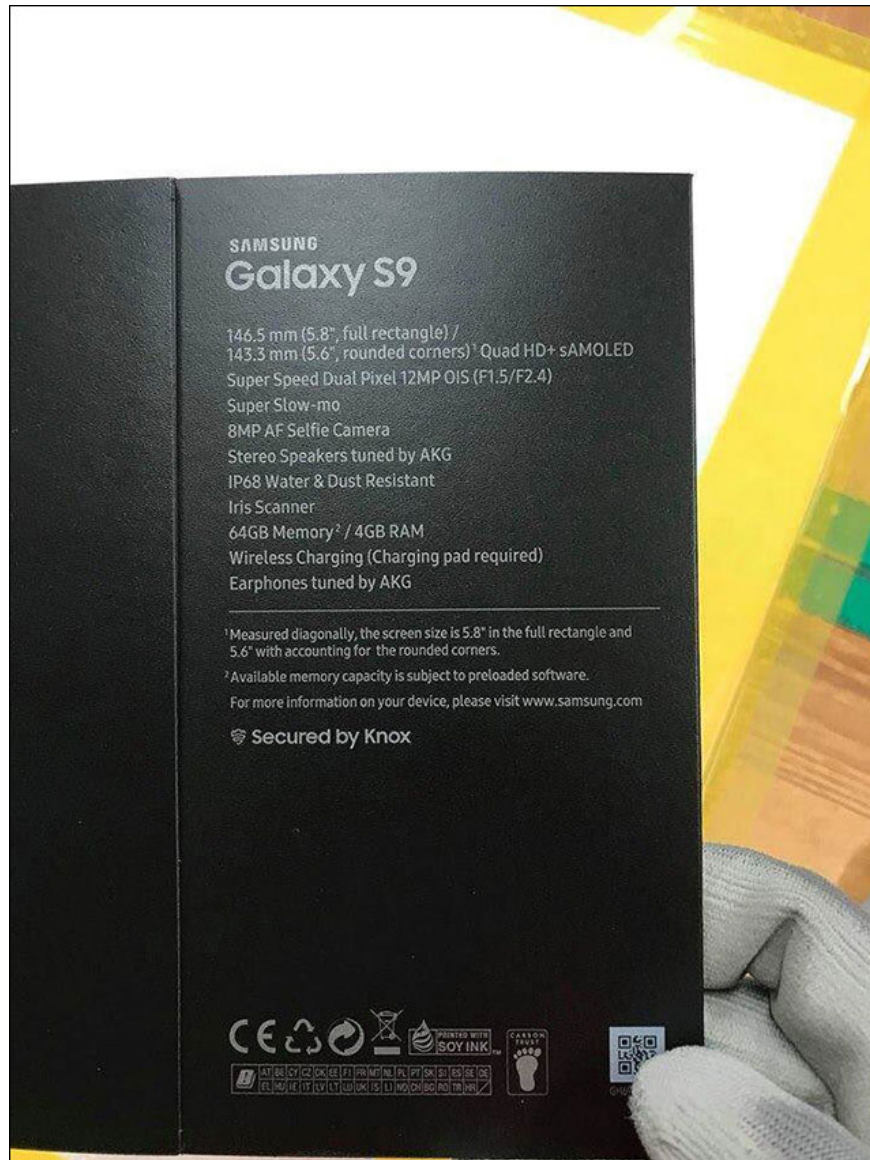

According to another source, the S9 camera will have new features such as ultra-slow video recording, which can be felt from Apple, which gives a single G9 camera and dual camera on S9 Plus.

It is also possible to expect some other familiar features like wireless charging or water and dust protection.

Much information about the hardware has not been disclosed

There are reports that the battery will still be the same but there are rumors that the battery will be a little stronger. If the screen size or quality does not change, there is no need to upgrade the battery. Memory and storage capacity will be similar to S8. It is known that Samsung has extra storage capacity so it will probably be

available on S9.

Batteries, wireless charging, headphone jacks are all in secret areas

Currently, S9 will probably still use the traditional 3.5mm jack while others like Apple or Google have stopped using this plug. Maybe Samsung will do the same as other brands on S9.

There are further rumors about S9

Some rumors suggest that Galaxy S9 will have technology to recognize voice like Face ID and Apple Animoji on iPhone X. Samsung is now able to scan the iris and identify faces on existing phones, so Easy if officially launched on a new machine.

This rumor appears when Samsung announced the release of Exynos 9810 chip, which can be used for Galaxy S9, capable of face detection.

Another rumor said that there will be an S9 version with 8 times the storage capacity of current Galaxy. This news stems from Samsung's claim to be developing 512GB onboard storage capability to support multimedia files, especially high-quality video.

Samsung recently released Galaxy A8 with dual cameras on the front, making us wonder if Galaxy S9 is like that or not. But maybe the dual camera will be exclusive on the S9 Plus rear camera.
