

# Samsung Galaxy S11 is certified in China, supports 5G, 25W fast charging, the world's best camera

The Galaxy S11 will be officially launched by Samsung at the end of February next year, and will also be the most sought-after flagship in the first half of 2021.

If nothing changes, the Galaxy S11 will be officially launched by Samsung at the end of February next year, and will also be the most sought after flagship model in the first half of 2021.

In addition to being equipped with the most powerful hardware configuration in the world at the time of launch (traditional Galaxy S series), this handset is also expected to own the best camera cluster Samsung has ever produced. Not only that, the Galaxy S11 is also rumored to be one of the fastest charging smartphones in the world because according to information obtained from 'leak expert' Ice Universe, Samsung's flagship model, although not yet launched, has been This device has been certified to be sold in China, including mentioning that the device will use EP-TA800 charger with support for 45W fast charging.

More specifically, certification shows that the Galaxy S11 and S11e will support 25W fast charging, while the S11 Plus will support fast charging up to 45W similar to the Galaxy Note 10 Plus.

Returning to the most notable detail in the Galaxy S11 leaked series revealed by Ice Universe, experts believe that the Galaxy S11 (model number SM-G9860) will be the product that will set a new benchmark for the Galaxy S11. Mobile cameras - an aspect that is increasingly gaining interest in the smartphone industry. Accordingly, Galaxy S11 will own the main camera sensor with a resolution of up to 108MP using a potential lens module to enhance the ability of optical zoom (5x optical zoom), and the ability to support 8K @ 30fps video . Combined with a host of software support features such as the Director View mode that allows users to

record videos from multiple cameras, Night Hyperlapse supports low-light photography, Single Take Photo and Vertical Panoramas.

Not long ago, Ice Universe also posted a series of screenshots showing that the Galaxy S11 is expected to have a screen with a 20: 9 aspect ratio that is quite 'weird', a slight increase compared to the 19: 9 ratio on the Galaxy S10. It is also said to have a refresh rate of up to 120 Hz.
