

Samsung launched 5 ultra-portable Series 9 laptops

After a period of monitoring the performance of ultraportable laptops on the market share, Samsung decided to expand the ultraportable laptop line with 5 eye-catching models. It is expected that the company will be on shelves before the new school year 2011.

After a period of monitoring the performance of ultraportable laptops on the market share, Samsung decided to expand the ultraportable laptop line with 5 eye-catching models. It is expected that the company will be on the shelves before the start of the new school year 2011. These new products include three 13.3-inch models and two 11-inch models, priced from \$ 1,049 to \$ 2,049. Just like the original Series 9 series only improved faster in speed and technology.

Below is the technical table of 5 product lines:

| Model | Size | Processor | Memory | Storage | Price |
|----------------|-------|---------------------|----------|-----------|---------|
| NP900X1B-A02US | 11" | Intel Core i3-2357M | 2GB DDR3 | 64GB SSD | \$1,049 |
| NP900X1B-A01US | 11" | Intel Core i3-2357M | 4GB DDR3 | 128GB SSD | \$1,249 |
| NP900X3A-B01US | 13.3" | Intel Core i5-2467M | 4GB DDR3 | 128GB SSD | \$1,349 |
| NP900X3A-B02US | 13.3" | Intel Core i5-2467M | 4GB DDR3 | 128GB SSD | \$1,649 |
| NP900X3A-A05US | 13.3" | Intel Core i7-2617M | 6GB DDR3 | 256GB SSD | \$2,049 |

All five models use LED-backlit 1366x768 "SuperBright", duralumin spiffy frame, Windows 7 Home Premium and battery life of up to 7 hours. Although Samsung does not provide a complete summary of the connection support, it said that a product that supports USB 3.0 ports can use connected devices while the laptop is off.

Samsung Series 9 with FastStart technology allows computers to store data temporarily for three seconds when unexpected shutdown. The 13.3-inchers have a thickness of 0.62 inches and weigh 2.89 pounds.

New Series 9 models are expected to be widely available at retail outlets in the next month since the official announcement. For the time being, Apple is expected to popularize the MacBook Air's products, according to widespread information, new refurbished ultraportables will appear in mid-July with Intel Core Duo 2, Core i3. Second system, Core i5 and i7 chips (aka Sandy Bridge), Many also believe that the new Macbook Air will have Thunderbolt connectivity.
