**Ahead of the CES 2015 event, Samsung has launched ATIV Book 9 version 2015 with many valuable improvements. In terms of overall design, ATIV Book 9 2015 still has the familiar features of ATIV Book 9 before.**

However, Samsung has been significantly thinned. Samsung says the 2015 ATIV Book 9 is the thinnest and lightest notebook they have ever made: the device is only 11.4mm thin and weighs 0.94kg.

Besides the remarkable thinness, Samsung ATIV Book 9 2015 also has a very high-end configuration with a 12.2-inch screen, a resolution of 2560x1600. Samsung said it has equipped outdoor visibility for ATIV Book 9 2015, you just need to press a button to automatically push the screen brightness up to 700 nit.

ATIV Book 9 2015 also owns Intel Core M CPU, using Broadwell microarchitecture. The remarkable point of Intel Core M is that it helps ATIV Book 9 2015 save more battery power, significantly higher operating efficiency and especially the machine does not work without the need for a cooling fan - this is the main factor. The ATIV Book 9 2015 has a thinness of only 11.4mm.

In terms of software, Samsung has integrated some interesting features such as when users press **Fn10**, the computer will automatically hide all running windows, or touchpad based drawing feature. Samsung also equipped ATIV Book 9 2015 **Ultra Power Saving** mode - Similar to many other Samsung smartphones that allow us to turn off all unnecessary services that are running, saving battery life and increasing the amount of time spent using the device.
