

# Samsung launched the biggest 8K TV on the planet, 98 inches, yet any television content reached a great definition for projection

Recently, Samsung has launched a 98-inch giant TV, the definition reaches 8K threshold at the 2019 CES event being held in Las Vegas that many people are surprised.

Recently, Samsung has launched a 98-inch giant TV, the definition reaches 8K threshold at the 2019 CES event being held in Las Vegas that many people are surprised. Earlier, Samsung also introduced a huge TV with a size of 219 inches but the definition could not match.

However, it is worth mentioning that 8K TV content is not yet popular for users. Yet Samsung has surpassed other rivals, waiting for it right now.

The size of 8K TV is bigger than a man.

To suit the user's needs, Samsung also offers other size versions for users to choose including 65/75/82/85 inches.

This 8K TV is equipped with an 8K quantum chip with Samsung's exclusive AI technology that enables it to automatically identify and help make the image's sharpness nearly equal to 8K, bringing Great experience for users. This means that, with the help of available technology, Samsung brings TV that will turn 4K images into

8K.

At CES 2019, Samsung also screened the current hot Game of Thrones episodes. The original version of the movie did not meet the 8K standard, but the image presentation was raised almost 8K absolutely.

Another special move from Samsung surprised many people by bringing iTunes and AirPlay 2 to their smart TV models.

Currently, the price of this world-class genuine TV has not been disclosed but it will definitely be 'chat'.
