

Samsung launches mid-range Galaxy M21 smartphone with 6,000 mAh battery, rectangular rear camera cluster like Galaxy S20, priced at 175 USD

Samsung has just launched a new mid-range smartphone, called the Galaxy M21.

Samsung has just launched a new mid-range smartphone, called the Galaxy M21. The smartphone is impressive thanks to the battery capacity of up to 6,000 mAh, and the rectangular rear camera cluster is quite similar to that of the Galaxy S20.

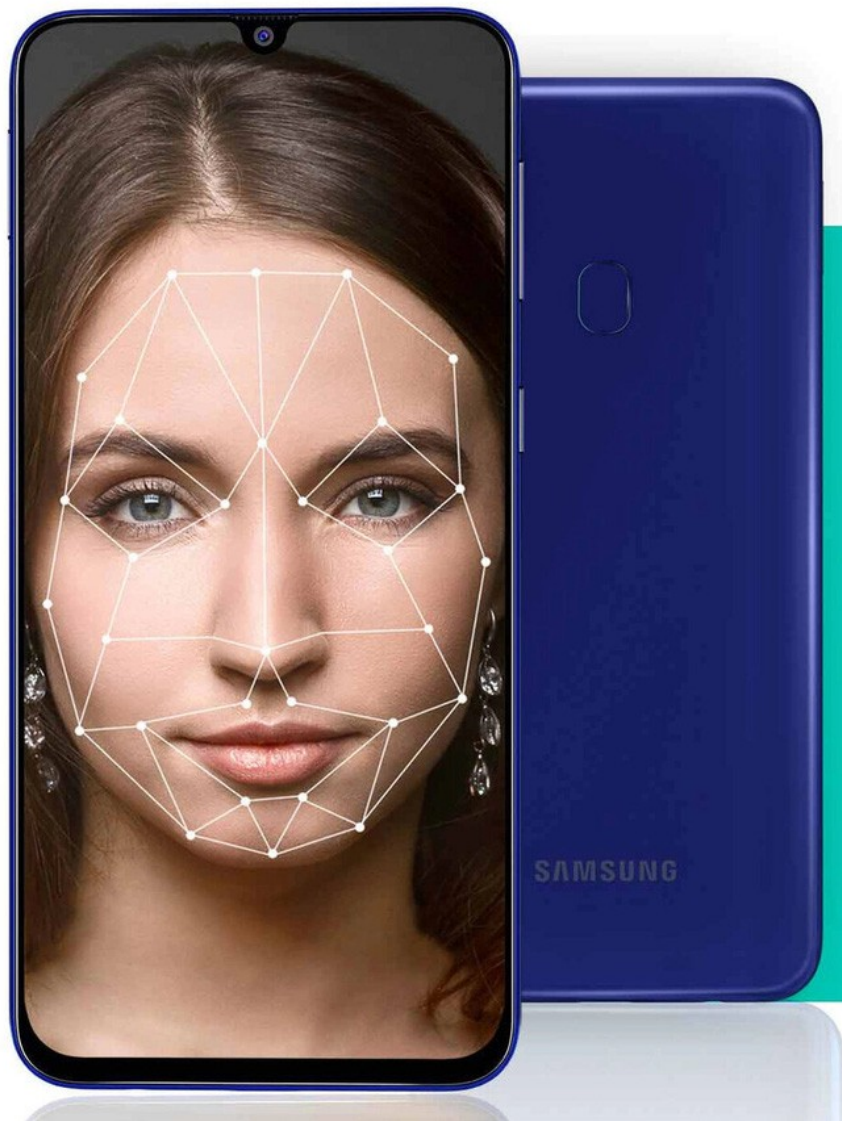

Galaxy M21 has a waterdrop screen design, with pretty thin bezels. The plastic exterior, however, doesn't look too cheap. The back has a rectangular camera cluster with 3 lenses and an LED flash. There is a fingerprint sensor on the back.

6.4-inch LCD screen, FullHD + resolution and protected by Corning Gorilla Glass 3. The rear camera has a 48MP main sensor, a 5MP wide-angle lens, and an 8MP telephoto camera. 20MP selfie camera

Samsung equipped inside Exynos 9611 processor, 4GB RAM 64GB, or 6GB RAM 128GB capacity. 6000 mAh battery capacity, with 3.5mm jack, pre-installed operating system Android 10.

Samsung Galaxy M21 is currently on sale in India, priced at \$ 175 for 4GB RAM. There are two colors: Midnight Blue and Raven Black. There is currently no information about the launch of this smartphone in other markets around the world.

Overall, the Samsung Galaxy M21 is a decent priced smartphone / performance. Beautiful exterior design, with 3 rear cameras and a large battery capacity. This smartphone will likely help Samsung occupy the low-end and mid-range segment in the Indian market.
