

Samsung officially launched Galaxy A02

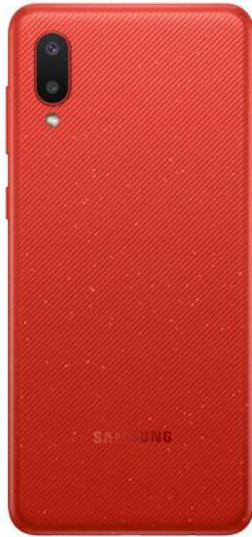

Samsung has just introduced the popular phone model Galaxy A02 (2021) with a large screen and 5,000mAh battery.

Recently, Samsung has officially opened the sale of **Galaxy A02**, a popular product line that **attracts** attention when equipped with dual 13MP camera, 5000mAh battery, 32GB of internal memory and 6.5-inch Infinity-V screen with infinity edge.

In terms of design, Galaxy A02 owns a 6.5-inch Infinity-V screen with an infinity edge with a 20: 9 ratio, accompanied by a selfie camera with 5MP resolution. This screen also uses HD resolution and Infinity-V design to help optimize the entertainment experience.

The back of the device is a plastic back, but it is designed with diagonal stripes to help highlight the device. On the back of the Galaxy A02 is equipped with a vertical camera cluster, with a 13MP main camera and 2MP macro camera.

Main camera 13MP large aperture $f / 1.9$ for better dark shooting capabilities with macro camera for close-up 2MP. In which, macro camera is the technology that appeared on Samsung Galaxy A high-end and high-end products.

With the ownership of a macro camera, Galaxy A02 users can capture details of objects at a distance of 3-5 cm, bringing eye-catching visual effects.

Galaxy A02

In addition, the Galaxy A02 camera also adds available color filters, users can switch with just one button without paying too much attention to complicated parameters.

Galaxy A02 is equipped with a 5000mAh capacity battery. With this battery capacity, users can talk for 1.5 days; watch movie 01 day; listen to music 04 days after a single charge.

Galaxy A02 equipped with 32GB of internal memory and 3GB RAM, to meet the needs of use and the ability to manage multitasking on the device. For users with heavy storage needs, Galaxy A02 also has 1TB expandable

memory card slot.

Galaxy A02 officially launched on February 19, 2021. Machine will have three color options, including: Blue, Black and Red.
