

Samsung partnered with MediaTek to create the world's first 8K Wi-Fi 6 TV

Samsung and MediaTek have introduced the world's first 8K QLED TV that supports Wi-Fi 6. Samsung 8K QLED Y20 models (Q950, Q900) support the new Wi-Fi standard and are equipped with a custom Wi-Fi 6 chipset. by MediaTek.

This is the latest flagship TV of the Korean technology giant and is currently the only Wi-Fi 6 connected TV available globally. In other words, Samsung 8K QLED Y20 will provide a better multimedia experience thanks to the latest generation Wi-Fi connection.

The world's first QLED 8K Wi-Fi 6 TV

Wi-Fi 6 is the latest standard in the field of wireless and has a higher data transmission rate but is more energy efficient than the old standard. In other words, this is the technology that will make the experience of online 8K content smoother and more seamless.

According to a press release from MediaTek, " Samsung is MediaTek's long-term strategic partner and their innovation efforts have enabled MediaTek to continue bringing leading IC solutions such as Wi-Fi 6 to the market. is pushing for the development of the high-end smart TV segment. Partnering with them in the launch of the first 8K Wi-Fi 6 TV is just the beginning of a strong global demand development for the standard. Wi-Fi 6 ".

Put simply, the collaboration of the famous chip manufacturer with the consumer electronics giant aims to bring a new standard in the experience of multimedia media content.
