

Samsung updates web browser: improves speed, protects users from malicious code

Samsung Internet Browser, the default web browser on Samsung models has been updated to version 7.2 for smoother, safer operation.

Samsung Internet Browser, the default web browser on Samsung models has been updated to version 7.2 for smoother, safer operation.

New outstanding features of Samsung Internet Browser

1. The browser engine has also been upgraded to Chromium M59, which helps speed up web browsing, improve the graphics quality when playing online games.
2. Ability to protect users when browsing the web. When users access websites that steal data or have malicious code, this feature will issue warnings.
3. There is an "Add to home screen" icon for web applications and "reader mode" for reading news".
4. Switching between tabs has also been optimized to help operate effectively even on low-profile devices, with Ram less than 1 GB.

Currently, these changes have only been updated for beta but the official (stable) version will be updated soon. To be able to use this browser, you do not need to own a Samsung phone but only need a phone running Android 5.0 and above is okay.

You can download both versions on the Google Play store completely for free under the link below.

1. Samsung Internet Browser - Android apps on Google Play
2. Samsung Internet Browser Beta - Android apps on Google Play
