

Samsung will support 7 years of free software upgrades for AI TVs running the Tizen operating system

If you are looking to upgrade your TV and want a long-term option in terms of software support, you can consider buying a Samsung AI TV running the Tizen operating system.

If you are looking to upgrade your TV and want a long-term option in terms of software support, you can consider buying a Samsung AI TV running the Tizen operating system. The reason is because Samsung has just officially announced its plan to provide 7 years of Tizen operating system upgrades for some of its Smart TV models.

Earlier this year, the South Korean tech giant also announced plans to provide seven years of software support for its flagship Galaxy smartphones. This policy allows Galaxy device owners to use their Galaxy devices with peace of mind for longer, while still enjoying the latest One UI features without compromising security.

Returning to the same support policy for Samsung Smart AI TV. The free 7-year Tizen OS support package will certainly add significant value to Samsung's new generation TV line, allowing users to benefit from new features and enhanced security for a long time. than.

Specifically, the initial upgrade policy will apply to AI TV models in 2024 and some models released in 2023. Not only within the Samsung ecosystem, this is also big news in the industry. Smart TVs, as the vast majority of major OEMs in the market currently only offer two or three years of software updates for the product regardless of segment.

This new software update policy is expected to further solidify Samsung's position as a leader in the global TV industry, separating it from emerging Chinese rivals.
